

with - I had only 2 rounds
 of Winchester ammunition with
 me and used both to bring
 down a deer - The deer
 needed a third shot to complete
 the kill - With no Winchester
 ammo left I chambered a
 Remington-Union round - The
 bolt would not close - I
 applied force - the bolt
 seated and the handle
 started downward - the
 rifle discharged -

I would like a Remington
 rifle in like caliber to correct
 this situation - I cannot
 ever trust hunting with this
 rifle after it discharged on
 its own. You may contact
 me at 703-755-4011 After 5 PM EST.
 If you have any questions
