Gentlemen:

Examination has been completed on your customer's, Mr. LaRense
Parker, Model 700 BDL caliber 7mm Exp. Rem. rifle, serial number
A6696592, which you returned to us when it allegedly fired when
it was being unloaded.

The returned firearm, which was produced in November 1978, has
been examined by our firearms experts who report that it contained
our high-pressure proof test, gallery test, and final inspection
stampings, indicating that it had successfully passed all our nec-
essary tests prior to shipment.

The general condition of the gun appeared to be like new and it
was noted that a scope had been mounted after it originally left
our factory. In going over the individual parts, we found the
head space normal, recoil shoulders normal, and chamber normal.

Examination of the rifle and trigger assembly could not duplicate
the incident you have described. All parts tolerances and dimen-
sions were found to be normal, including sear-connector engagement.
Also, factory seals were intact on the trigger adjustment screws,
indicating no alterations were made on the trigger outside our com-
pany. Trigger pull was well within our specifications at 4½ pounds.

Based on our findings, Remington Arms Company, Inc., cannot accept
any liability or responsibility for the incident. We can only as-
sume that at the instant the bolt was grasped, accidental contact
was made with the trigger, causing the gun to fire.

-1-

*Please return firearm as received. We
could find nothing wrong with gun either.
But customer insisted he did not touch
trigger - Up here will replace gun to cust. The one
you have will return to stock. [signature]*
