CONSUMER SERVICE

Dear Sir

I am very dissatisfied in my model 700-25.06 bolt action Rem. First of all I wanted a clip or a sliding bottom, because in Minnesota we have to have our guns in a case so the gun is too slow to load by the time you get it loaded the deer is gone. Because in Minnesota we have to have at least a 24 caliber for deer. So for deer, fox and wolf I think is the best gun for me. I have a 30.06 automatic that I have had for 24 years and a 30 Remington before that, great guns. The only gun you got with clip is 243 and I

My second problem is that your gun has to be on fire to unload, very unsafe. Well yesterday while unloading my gun it went off and went threw my pickup truck and did a lot of damage, thank god it wasn't a person. It went threw the back of the pickup, threw the seat, threw my lunch pail, threw the heater, cut some hoses off and threw the front fender. What a rotten way to have a gun. I have that the 1984 model can be on safe to unload. That would help a lot at least no one would get

don't like it for deer
