

killed, I am very scared of this gun
I have been a Remington man for
28 years. I don't know if I should
look Browning or Winchester to find a 25.06
bolt with a clip, you don't even make a
25.06 in a automatic. I would even like
one of them.

Can I change this safety so that
I can use this gun without be scared
I think these guns should all be called
back, like a car when they are not
safe. These balls have been like this to long.

Please write me and give me
answer before I trade it off I won't
keep it the way it is

Thank you

Gerold Wayne
