

12/14/81

Dear Jim,

As per phone conversation. Here is
the details of the incident.

Subject was sitting in a 3/4 ton Chevy
pickup on a deer lease. Subject loaded
Kincom with 4 shells in magazine & 1 in
chamber. Holding gun in left hand,
with right hand, he tried to move safety
to "safe" position, safety would only go
1/2 way. so subject moved safety
to fire position, and in doing so
the gun discharged ~~to~~ with project.
entering air foot. leaving the shell
through the floor board and into the
right front tire! end!

Very truly yours,

Wichita Gunsmith
