

Sept. 23 - 1991

Remington

I bought this gun fall of 1989.
It worked fine for a couple of
months. Then it started miss firing
at times. I'd say it shot about two
boxes of shells.

Right now it's really messed up.
I can take the safty off and it
will fire without pulling the trigger.

And the wood stock is starting to
split.

I need it replaced or fixed.
I would like to have it by the
first of Nov. 1991.
