Please describe your problem: <u>When I was preparing to exit a tower deer stand, I laid my gun on the carpeted floor. As I was about to descend the ladder, I slid the gun by the butt over closer to the ladder. My hand was not near the trigger. The gun was on the floor as I slid it when it discharged. It was loaded and the safety had been on. Afterwards I felt the carpet, which is smooth, and looked for anything that may have caused this. I love my gun and want to regain the confidence I had in its safety. Therefore, I would like to have it checked for any problems with this model.</u>
