Remington

May 13, 2009

Dear Sir or Madam:

Upon cleaning the model 700 243 Remington rifle, the safety was checked by placing in the on position. Pulling the trigger checked the dry fire. The safety held. However, after releasing the safety the rifle fired?

The rifle was rechecked again with the same process. The rifle's safety held again but when the safety was released the rifle fired?

Please check the rifle for its safety, as there appears to be a problem with your design of its safe mechanisms.

Sincerely,

Michael E. Hildman

Michael E. Hildman
