Ref: #5503

Dear Mr. Heine,

You will receive a pre-paid shipping label in a separate email within 2 business days. Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

Keith,

We would like to have the firearm come into our Product Services Department at our factory for examination. Please reply back to me with the serial number of the firearm, caliber, your mailing address and phone number. We would like to send you a pre-paid shipping label for UPS to have the firearm come in. I will also include a form that you can fill out to let the examiner know exactly what happened, when this occurred, and what you are expecting.

Sincerely,
Dell

Customer (Keith Heine)

11/29/2010 05:26 PM

I have a 270 model 700 and the safety has always been very stiff and hard to move. I always figured that it would wear a little so it was not so hard. Anyway I was hunting this weekend and went to take the safety off and the gun went off. I thought maybe I had put my finger on the trigger to help take it off safety. So I just played it off. But when I got in from hunting it was bothering me so I completely unload the gun and sprayed some oil inside the safety switch and it did it the gun went off. I know for sure my finger was nowhere close to the trigger because I paid close attention the what was going on. It bothered me the first time. I was raised with very strict gun safety, so it bothered me pretty bad to have a gun go off like that I thought I had done something wrong. I there something I need to do or who do I take it to?
