12/1/10 Per email sent to Remington.com, incid # 101130-000032, "On November 28 I was hunting with a pre 1970 model 721 and upon completion of the hunt I attempted to open the bolt to unload the firearm. As I rotated the bolt I realized that it was locked and that I needed to take off the safety before opening the bolt. I had the gun pointing safely down range and as I pushed the safety to the fire position and the gun misfired without me touching the trigger. What could you suggest that I do about this problem? I happened to see a CNBC story last month and never thought that it would occur with my firearm, but it did. This has not happened before, but I also don't think I ever tried to rotate the bolt with the gun in the "safe" position. We have never had a problem with any other Remington firearms and I will continue to buy Remington guns, but any direction that you can provide is appreciated."cm

Covington, KY 41011

Subject: #5273, Model 721

Dear Mr. Seaman,

Enclosed is the UPS ground shipping label for shipment of the rifle to our factory for inspection. Please include a copy of this letter with the firearm. **The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly.** Please mark the ends of the box with "Product Service". Apply the label to your box and take it to a UPS terminal or driver for shipping.

I apologize for the inconvenience that this incident has caused and I hope that these actions will keep you as a loyal Remington customer.

Sincerely,

Christy Mitchell
Consumer Affairs Administrator

Customer (Tim Seaman) 12/01/2010 11:38 AM

That is fine...the address on my email. Thank you From: Remington Information [mailto:info@remington.com]
Sent: Wednesday, December 01, 2010 11:20 AM
To: Tim Seaman
Subject: Model 721 .270 [Incident: 101130-000032]

Response (Christy -) 12/01/2010 11:20 AM

Mr. Seaman, I can send you a UPS ground prepaid shipping label to cover shipment to our factory for inspection. After inspection I would call you with the results and resolution. Let me know if you want it mailed to the address in your email. That will be the address it will ship back to as well.

Customer (Tim Seaman) 11/30/2010 09:41 AM

On November 28 I was hunting with a pre 1970 model 721 and upon completion of the hunt I attempted to open the bolt to unload the firearm. As I rotated the bolt I realized that it was locked and that I needed to take off the safety before opening the bolt. I had the gun pointing safely down range and as I pushed the safety to the fire position and the gun misfired without me touching the trigger. What could you suggest that I do about this problem?

I happened to see a CNBC story last month and never thought that it would occur with my firearm, but it did. This has not happened before, but I also don't think I ever tried to rotate the bolt with the gun in the "safe" position.

We have never had a problem with any other Remington firearms and I will continue to buy Remington guns, but any direction that you can provide is appreciated.

Thank you
