

Remington®

2006 PRES KIT

TO OUR FRIENDS IN THE OUTDOOR PRESS

Remington's ongoing success in the industry is a result of the company's aggressive efforts to bring innovative firearms, ammunition and accessory products to the marketplace. As we move forward, our efforts are expanding beyond our domestic manufacturing capabilities and Remington is launching partnerships with manufacturers worldwide. This global approach allows Remington to offer our customers a broader range of high quality, value-packed products. All products will proudly wear the Remington name and meet our high standards for quality.

By combining 190 years of manufacturing excellence, the deep commitment to research and development, and our new global approach, Remington is poised to maintain its unique position as market share leader in firearms and ammunition manufacturing.

Our PR and marketing strategies have taken on a new direction as the marketplace has evolved. You will continue to see an Annual Press Kit; however, as new products join the Remington line-up, we will make the effort to keep you better informed with mailings throughout the year. Please remember to visit our web site at www.remington.com for the latest product introductions, corporate news and downloadable, hi-res photography (www.remington.com/artwork). And you can contact our office via the toll-free writers' line at 800.537.2278 or email us with your questions and requests.

Each of you has a role in preserving our hunting and shooting heritage and without your support, our way of life would be lost to generations to come. On behalf of the Remington family, thank you for your dedication and continued efforts to promote our industry.

REMINGTON CONTINUES THE LEGACY AND HERITAGE OF THE PARKER® GUN - AMERICA'S FINEST SHOTGUN

Madison, NC – The Remington Arms Company, Inc. is proud to announce an extremely limited and exceptional offering of **The Parker Gun AAHE 28-gauge** classically-styled, double barrel side-by-side sporting gun. This handcrafted masterpiece captures the nostalgia and intricate details that garnered The Parker Gun its legendary status. This is not a replica, not a remake - this is an original Parker.

Remington has commissioned Connecticut Shotgun Manufacturing Company to skillfully build these highly coveted Parker Guns. Orders will be limited only to guns that can be delivered in a twelve month period and that have been secured with a deposit. For those inquiries beyond the initial twelve month period, a waiting list will be compiled. This extremely limited, 28-gauge double gun will be priced at \$49,000 and can be ordered directly from Remington.

The Parker Gun aura of legendary reliability and pointability results from its construction of the highest quality materials and the painstakingly, stunning craftsmanship with attention to every detail. This AAHE 28-gauge will feature the finest Exhibition Grade Circassian walnut with hand rubbed finish and intricate 28 lines per inch checkering; breathtakingly-detailed engraving that encompasses the receiver and features traditional ruffed grouse and woodcock sculpted on opposing sides or the purchaser has the option of customizing the engraving; the "Parker" brand is marked on the bottom of the receiver with the continuation of the original serial numbers; and optional barrel lengths and boring. Many other details can be personally customized for the owner including optional American walnut, nameplate, fore-end and grip styles, single or double trigger and custom fit dimensions for LOP, drop, cast and pitch. This exceptionally fine-quality double gun is presented in a distinguished oak and leather case.

Since its beginning, the Parker Gun has been revered by shotgun enthusiasts worldwide. The same fit, feel and finish is captured in this stunning, limited offering of the AAHE 28-gauge double guns by Remington. For more information on these finely crafted Parker Guns, please visit the web site at www.parkergunmakers.com.

NEW PRODUCTION MODEL 1100™ COMPETITION PROVIDES CUSTOM GUN PERFORMANCE FOR THE SERIOUS CLAY TARGET SHOOTER

Madison, NC – Over 40 years after its introduction, the Remington® Model 1100 autoloader is still the choice of many competitive shooters for its superior performance, handling qualities and rich tradition on skeet and trap fields worldwide. New for Spring 2006 is the **Model 1100 Competition** 12-gauge shotgun, ideal for the sporting clays course, and an adjustable comb version which is right at home on the trap field. This well-designed autoloader provides the serious target shooter a true high performance shotgun direct from the factory.

With all of the smooth-handling and reliable operating features of the Model 1100 field guns, the **Model 1100 Competition** package adds the performance-enhancing and classic design features required for today's competitive sporting disciplines. This soft-recoiling, 12-gauge autoloader has been optimized to handle 2³/₄-inch target and light field loads and features an extended carrier release for quicker reloading. The 30-inch target-style barrel has a wider 10mm vent rib and is overbored with a diameter of .735". Lengthened forcing cones lessen shot deformity, improve patterns and further reduce the felt recoil of this soft-shooter. Additionally, the barrel is equipped with new extended ProBore™ custom-designed choke tubes with Skeet, Improved Cylinder, Light Modified, Modified and Full tubes included. Ivory front bead and steel mid-bead sights provide for ease of target acquisition and improved second shot follow-up. Enhancing the performance level, this Model 1100 has a nickel-plated, Teflon® finish on internal operating parts (action bars, action bar sleeve, action spring, locking block, hammer, sear and magazine tube) and on the trigger, carrier release and receiver assembly. This slick extra layer of finish improves cleaning as well.

The **Model 1100 Competition** features a semi-fancy, B grade American walnut stock with handsome hi-gloss finish and cut-checkering. A non-glare, bead blasted top and bottom radius compliments the polished satin finish on the receiver sides and the barrel has a high polish blued finish. Designed to provide proper fit, the competition-style stock has a 1¹/₂-inch drop at the comb, 2¹/₄-inch drop at the heel and 14¹/₄-inch length of pull and is fit with the R3® recoil pad. The Adjustable Comb version, ideal for trap shooting, can be set to a low of 1¹/₂-inches at the comb and 2¹/₄-inches at the heel. This target gun is designed for maximum performance and custom-fit to meet every shooter's needs.

History speaks for itself, more competitive shooters look to Remington to provide a reliable well-designed, high performance shotgun when every target counts. The **Model 1100 Competition** 12 gauge autoloading shotgun is available at a suggested retail price of \$1275 and the Adjustable Comb version is available at \$1449.

LEGENDARY REMINGTON® MODEL 1100™ IN CLASSIC FIELD VERSION NOW AVAILABLE IN FULL RANGE OF GAUGES

Madison, NC – The classic handling and low-recoiling features of the Remington Model 1100 autoloading shotgun make it a natural in the field and for the first time in 25 years, the full range of gauges is now offered in a field version of this ever popular autoloader. Joining the 16 and 20-gauge versions are three new **Model 1100 Classic Field** offerings – a 12 gauge version with 26 or 28-inch barrel lengths, a 28-gauge and .410 bore, both offered with a 25-inch barrel. These additions to the Classic Field line-up make the Model 1100 the only autoloader currently available in all five gauges.

The **Model 1100 Classic Field** autoloader features an American Walnut classic-styled stock and fore-end with semi-gloss finish. Enhancing the traditional look of this shotgun are machine cut-checkering on stock and fore-end, white diamond grip cap, white line spacers and standard butt plate. The non-embellished receiver with high polished blue finish has the “Classic Field” roll mark and the vent rib Rem™ Choke barrel features the same blued finish. Suggested retail prices range from \$799 to \$832.

The classic look and unrivaled performance of the Model 1100 autoloader make it a standard in the field and helped earn the title of best-selling autoloader of all time. Visit our web site at www.remington.com for a complete listing of the Model 1100 family of autoloading shotguns.

ENHANCEMENTS TO REMINGTON® SPS™ LINE OF TURKEY SHOTGUNS ANNOUNCED FOR 2006

Madison, NC – The ruggedly-designed Special Purpose Synthetic (SPS) line of Model 11-87™ autoloading and Model 870™ pump-action shotguns have proven themselves in the dove fields, duck blinds and turkey woods time after time. For 2006, two 12-gauge Super Magnum™, Mossy Oak® camouflaged versions join the SPS-T™ family and the complete SPS line of Model 11-87 and Model 870 turkey shotguns will feature receivers drilled and tapped to facilitate scope mounting with the use of a Weaver-style rail (Weaver part number 470).

Model 11-87 SPS-T Super Magnum Camo – Though designed for the avid turkey hunter, this 12-gauge, 3 1/2 inch capable autoloader is an extremely versatile field gun, ideal for waterfowl, upland or predator hunting and for use with buckshot loads. Fully camouflaged with Mossy Oak Obsession®, this gas-operated shotgun handles 2 3/4, 3 and 3 1/2-inch shells interchangeably and features a 23-inch vent rib, Rem™ Choke barrel with twin bead sights (ivory front bead and steel mid-bead). Supplied with a Turkey Super Full Choke tube (0.062" constriction), this shotgun has long-range capabilities and delivers optimum patterns. The durable, weather-resistant synthetic stock and fore-end, solid steel receiver that is drilled and tapped for Weaver-style rail and the soft-recoiling, patented operating system add to the reliability of this multi-purpose field gun. The stock is fit with the recoil-dampening R3® Pad and both stock and fore-end feature swivel studs. A padded camouflaged sling is included. Suggested retail price: \$1049.

Model 870 SPS-T Super Magnum Camo - No stranger to the turkey woods, the Model 870 shotgun is perhaps the most reliable and well-designed pump action shotgun in the field today. With its twin-action bar design, this 12-gauge Super Magnum provides smooth, non-binding action and will handle 3 1/2-inch loads down to standard 2 3/4-inch light field loads efficiently. For 2006 this Model 870 will feature full coverage in Mossy Oak's versatile Obsession pattern, twin bead sights and receiver that is drilled and tapped for scope attachment. The 23-inch vent rib, Rem Choke barrel comes with Turkey Super Full Choke tube. Like the Model 11-87, this SPS version features a solidly-designed synthetic stock and fore-end with sling swivel stud and magazine cap stud, padded camouflaged sling and high performance Remington R3 Recoil pad to lessen the felt recoil. Suggested retail price: \$615.

The extensive line of Model 11-87 and Model 870 Special Purpose Synthetic shotguns provide hunters with the versatility and durability needed for virtually any hunting scenario. Visit our web site at www.remington.com for a complete listing of our SPS line.

**MODEL 11-87™ SPECIAL PURPOSE-TURKEY
SUPER MAGNUM™ SHOTGUN AVAILABLE WITH THUMBHOLE STOCK**

Madison, NC – Turkey hunting is one of the largest growing segments in the marketplace today and turkey hunters demand specialty products for pursuit of that elusive gobbler. A shotgun that delivers maximum payload in a durable, superior handling package is first on their gear list. In response to their needs, Remington is proud to introduce the ultimate shotgun - the **Model 11-87 Special Purpose-Turkey (SP-T™) Super Magnum Thumbhole Camo** autoloader in the versatile 3 1/2-inch, 12-gauge platform.

Featuring a thumbhole-style, laminate stock with palm swell and wide fore-end, the Model 11-87 SP-T delivers rifle-like shot placement and steady handling while waiting for that tom to come into range. Optimum concealment is provided with full camouflaging of the stock, fore-end, barrel and receiver in Mossy Oak® Obsession®. The 23-inch Rem™ Choke barrel is supplied with a Turkey Super Full choke tube and is equipped with adjustable TruGlo® fiber-optic rifle sights for accurate shot placement. As a new feature for this model, the receiver is drilled and tapped for the option to mount a scope with a Weaver-style rail (Weaver part number 470). This hard-hitting, long range 12-gauge features a patented gas-operating system for reducing recoil; yet is capable of handling heavy 2 3/4, 3 and 3 1/2-inch shotshells. The addition of the revolutionary patented R3® Recoil Pad helps to significantly reduce the felt recoil. Sling swivel studs and matching camo padded sling complete this package.

Though designed with turkey hunters in mind, the Model 11-87 SP-T Thumbhole shotgun is ideal for predator hunting with its fast-handling capabilities and steady, rifle-like accuracy. Suggested retail pricing for the new Model 11-87 Special Purpose-Turkey Super Magnum Thumbhole Camo shotgun is \$1049.

THUMBHOLE SLUG GUN VERSION OF MODEL 11-87™ DELIVERS PRECISION ACCURACY AND LESS RECOIL

Madison, NC – Joining the highly functional line of Special Purpose field guns, Remington is pleased to introduce the **Model 11-87 SP (Special Purpose) Thumbhole Slug** 12-gauge autoloading shotgun. This fully rifled, magnum (2 3/4 or 3-inch) shotgun is designed to deliver rifle-like precision with today's high performance sabot slugs in the softer-recoiling, reliable Model 11-87 platform.

This Model 11-87 SP features a well-designed black laminate, thumbhole stock with comfortable roll-over style cheekpiece, palm swell and wide fore-end for steady handling and controlled shot placement. The heavy contour, fully rifled 21-inch barrel has a cantilever mount for the easy addition of optics and all exposed metalwork features a durable black matte finish. Like all Remington® Model 11-87 autoloading shotguns, this Special Purpose version features a patented gas-operating system for reliable feed and function with the benefit of reduced felt recoil. The unique thumbhole-style stock design provides for quick handling, steady shot placement and further reduction of recoil. Equipped with the revolutionary R3® recoil pad, this 12-gauge magnum shotgun reduces the "punch" of the hardest-hitting slugs by over 30%. Rear swivel stud, magazine cap swivel stud and padded nylon sling complete this solidly-built autoloader.

The **Model 11-87 SP Thumbhole Slug** gun delivers accuracy, reliability and effective on-game performance in an easy-handling package. Available at a suggested retail price of \$985.

NEW REMINGTON® MODEL 870™ SP THUMBHOLE SLUG GUN DELIVERS RIFLE-LIKE PERFORMANCE

Madison, NC – Successfully introduced as a 2005 SHOT Show Special, the **Model 870 Special Purpose (SP) Thumbhole Slug** gun will become a standard catalog offering for 2006 and joins an impressive family of specialty Model 870 pump action shotguns. Growing interest in the area of slug gun hunting has lead to the introduction of many technological advanced, high performance slug loads. Partner this well-designed Model 870 with our Premier® Core-Lokt® Bonded Slug or devastating BuckHammer® Lead Slugs and deer hunters can experience rifle-like accuracy and terminal performance like never before.

This 12-gauge magnum Model 870 slug gun features a thumbhole-style, black laminate stock with palm swell and wide fore-end for more steady, controlled shot placement. The solid laminate, thumbhole stock design not only provides stability but helps to absorb recoil. The addition of the revolutionary R3® Recoil Pad further lessens felt recoil. The fully rifled 23-inch heavy contour barrel, solidly-built steel receiver and dependable, non-binding action bar assembly are designed to deliver reliable, rifle-like accuracy shot after shot. The addition of a scope is made easy with the cantilever mounting system. Completing this durable Model 870 is a non-glare black matte finish on all metalwork, stock swivel stud, magazine cap swivel stud and durable, padded sling.

Remington provides deer hunters with a highly effective, reliable slug gun option with the new **Model 870 SP Thumbhole Slug** pump action shotgun. Available at a suggested retail price of \$672.

20 GAUGE SLUG GUN ADDED TO REMINGTON® SPORTSMAN® LINE OF MODEL 11-87™ AUTOLOADING SHOTGUNS

Madison, NC – Joining the Sportsman line-up for 2006 is the **Model 11-87 Sportsman Synthetic Fully Rifled Cantilever 20 gauge** shotgun, ideal for the deer hunter who wants rifle-like accuracy in a lighter weight, softer-recoiling package. This value-packed family of synthetic Model 11-87 shotguns, introduced in 2005, offers hunters a versatile line of durable field guns in standard 12 and 20-gauge versions, a 12-gauge fully rifled cantilever configuration and 20-gauge Youth model.

This 20-gauge magnum Model 11-87 autoloader can efficiently handle 2³/₄ or 3-inch sabot-style slugs with its solid steel receiver and patented gas-compensating system. These durable design features provide for smooth and reliable operation, less wear, quick follow-up shots and reduction of felt recoil. The 21-inch heavy contour, fully rifled barrel features a rugged cantilever scope mount for easy scope attachment, using Weaver-style rings. Both barrel and receiver have non-reflective, black matte finish. The weather-resistant, black synthetic Monte Carlo-style stock has rear swivel stud and magazine cap swivel stud. With the addition of a sling, this slug gun is ready to take afield.

With today's advancements in sabot slug technology, this well-designed Model 11-87 Sportsman 20-gauge shotgun delivers precision accuracy and devastating on-game performance with less recoil. Available at a suggested retail price of \$705.

For practice at the range, for use by younger or more recoil-sensitive shooters, consider partnering this soft-shooting slug gun with Remington's Managed-Recoil™ BuckHammer® Lead Slugs. The aftermarket addition of the revolutionary Remington R3® Recoil Pad can further reduce felt recoil. For additional information on Remington's complete line of slug loads and the R3 Recoil Pad, visit our web site at www.remington.com.

REMINGTON® SPECIAL PURPOSE SYNTHETIC SHOTGUNS TO FEATURE VERSATILE MOSSY OAK® OBSESSION® CAMO PATTERN

Madison, NC – For 2006, Remington's line of Model 11-87™ and Model 870™ SPS™ (Special Purpose Synthetic) camouflaged shotguns will feature the widely popular Obsession pattern by Mossy Oak – America's best-selling brand of camo. Combining the reliability and utilitarian qualities of the SPS line with the effectiveness of Mossy Oak's Obsession camouflage, hunters just may have an unfair advantage in the field.

Three popular 12 gauge models will be available including the **Model 11-87 SPS Super Magnum™** with 28-inch barrel length; magnum **Model 11-87 SPS** with 26-inch barrel length; and a **Model 870 SPS Super Magnum** with the option of 26 or 28-inch barrel length.

History tells a story and in 2005, Remington celebrated the 100th Anniversary of manufacturing its first autoloading shotgun. At the top of this impressive list of autoloaders is the Model 11-87 design. Available in 3-inch magnum and 3 1/2-inch capable Super Magnum versions, the Model 11-87 features a patented gas-operating system for reliable feed, less recoil and fast follow-up; rugged solid steel receiver; and superior handling.

Legendary for its design features, the Model 870 has smooth-operating, twin action bars which eliminate binding or twisting; solid steel receiver for unprecedented strength; and superior balance. With over 50 years of use in the field, the Model 870 sets the standard for all other pump-actions.

Recognized for their ruggedness and versatility in the field, these Special Purpose Synthetic shotguns have a weather resistant, fully camouflaged synthetic fore-end and stock, which features the recoil-taming R3® Recoil Pad. These revolutionary pads effectively absorb and redirect recoil energy, resulting in less fatigue in the field and quicker follow-up shots. Solid steel receivers and standard vent rib, Rem™ choke barrels feature full Obsession camouflage. Front ivory bead and steel mid bead top these versatile field barrels and a complete set of chokes (Improved Cylinder, Modified and Full) is supplied. A matching, padded camouflaged sling is included and easily attaches via rear swivel stud and magazine cap swivel stud. For complete specifications on this family of camouflaged SPS shotguns, please see the charts below.

Hunters and shooters need look no further than these reliable and durable Model 11-87 and Model 870 SPS shotguns concealed with all-season, all-terrain Mossy Oak Obsession.

REMINGTON ADDS VALUE-PRICED MODEL SPR453 SYNTHETIC AUTOLOADING SHOTGUN TO LINE-UP

Madison, NC – The **Model SPR453** line of synthetic autoloading shotguns features five ruggedly-designed 12-gauge (3 1/2-inch) offerings for scattergun enthusiasts, including camouflaged versions. Introduced to the Spartan Gunworks™ family of products in 2004, these autoloaders meet the same high standards as our domestic firearms products and will be marketed under the Remington® name in 2006.

These durable autoloaders feature a hammer-forged chrome-lined barrel, hammer-forged steel magazine tube and a self-regulating gas system that can be adjusted to handle 2 3/4-inch light target to heavy magnum 3 1/2-inch loads. Each **Model SPR453** is fit with a weather-resistant synthetic stock and fore-end, rubber butt pad and vent rib barrel with twin bead sights. Extended screw-in Spartan choke tubes are included and are all approved for use with lead, steel and non-toxic loads. Familiar cross bolt-style safety is located at the rear of the trigger guard. The purchaser has the option of the SPR453 autoloaders in either matte black synthetic in 26 or 28-inch barrel lengths with blued metalwork or fully camouflaged with Mossy Oak® New Break-Up® in 24, 26 or 28-inch barrel lengths.

For the wingshooter and upland game enthusiast, no matter what his interest - waterfowl, turkeys or upland game - this can be either an all-purpose or single-purpose shotgun at a reasonable price. Suggested retail prices range from \$390 to \$419.

For specifications on each **Model SPR453 Synthetic Autoloading Shotgun**, please see the chart below or visit our web site at www.remington.com.

REMINGTON ANNOUNCES FINAL SHOTGUN OFFERING IN DALE EARNHARDT TRIBUTE SERIES

Madison, NC – The limited edition series of Dale Earnhardt Tribute shotguns will conclude with the 2006 offering of a **Model 870™ Wingmaster® 20 gauge** pump-action shotgun. This four gun commemorative offering was introduced in 2003 to honor dedicated outdoorsman, Remington friend and NASCAR legend, Dale Earnhardt. The highly collectible Tribute series has included a Model 11-87™ Premier® shotgun in 12 gauge, Model 11-87 Premier in 20 gauge and Model 870 Wingmaster in 12 gauge. As with the previous offerings, a portion of each sale generated from these tribute shotguns will be donated to the Dale Earnhardt Foundation for their charitable work.

Features of this Model 870 Wingmaster in 20-gauge include handsome American walnut stock and fore-end with generous machine-cut checkering and hi-gloss finish; a 26-inch vent rib Rem™ Choke barrel; and receiver milled from a solid block of steel. The exposed metalwork has a beautiful high polish blued finish. Adding to the uniqueness of this collectible series are Earnhardt's likeness, his signature and decorative scrollwork engraved on the left side of the receiver and a tributary banner recognizing his seven Winston Cup Championships featured on the right side. The signature and banner are enhanced with 24 karat gold inlays and the distinctive serial numbers start with "DE3" which recognize the championship-winning #3 car that Earnhardt drove.

The ruggedly-built Model 870 pump-action platform features solid steel receiver, twin action bars for smooth, non-binding action and is recognized for its unmatched reliability. Combining this durable functionality with the classic, well-appointed features of the Wingmaster makes the 2006 Dale Earnhardt Tribute shotgun truly a collectible.

The final offering in this four-year series, the 20-gauge Model 870 Wingmaster, is available at a suggested retail of \$820.

POPULAR MODEL 870™ EXPRESS® LINE NOW OFFERED WITH UPGRADED LAMINATE STOCKS AND FORE-ENDS

Madison, NC – Renowned for its durability and reliability in the field, the Remington® Model 870 Express pump action shotgun is still one of the best values in the marketplace today. For 2006, the widely popular Model 870 Express will feature a sturdy, brown laminate stock and fore-end, enhancing the appearance and durability of this pump gun. This upgrade to the Express wood offerings provides added value to the end consumer.

By combining the more traditional appearance of a wood stock with the weather resistant qualities of synthetic stocks, laminates have gained tremendous popularity. Thin layers of wood are pressed and bonded with resin providing unrivaled strength, added resistance to inclement weather conditions and an enhanced look over traditional hardwoods. The laminate fore-end and stock coupled with the dependability of the smooth-operating, twin action bars; strength of the solid steel receiver; and legendary Model 870 handling qualities, makes the Express Laminate offering an exceptional value.

The extensive family of economical Model 870 Express pump action shotguns provides outdoorsmen with a wide range of durable, reliable options for every hunting situation. Please visit our web site at www.remington.com for a complete listing of Model 870 offerings.

REMINGTON® MODEL 870™ EXPRESS® SYNTHETIC SHOTGUNS TO WEAR POPULAR MOSSY OAK® CAMO PATTERNS FOR SPRING 2006

Madison, NC – The family of Model 870 Express synthetic shotguns provide outdoorsmen with a line of value-packed, durable pump actions - at home in virtually any hunting situation. For 2006, the camouflaged synthetic versions of the Express family will be offered in Mossy Oak Break-Up® and Shadow Grass® patterns. Favorites in the field, these all-purpose camo patterns provide maximum concealment in the woods, flooded timber or blind regardless of your quarry.

The **Model 870 Express Super Magnum™ Synthetic Camo** 12-gauge shotgun with 30-inch vent rib Rem™ Choke barrel features full coverage with Mossy Oak Shadow Grass. This high definition, three-dimensional pattern is ideal for wetlands, prairies and fields. Matched with the high performance and durability of this 3 1/2-inch capable Super Magnum, this Model 870 is the ultimate waterfowl hunter's tool. Suggested retail price: \$499.

Ideal as an all-purpose 12-gauge field gun, the **Model 870 Express Super Magnum Synthetic Camo** with shorter 23-inch vent rib Rem Choke barrel is fully camouflaged with Mossy Oak Break-Up. Supplied with an Extended Turkey Extra Full choke, this shotgun is ready for the turkey woods. With the quick change of a choke tube and the ability to comfortably handle 2 3/4-inch field loads up to hard-hitting 3 1/2-inch magnum loads, this pump action provides added versatility at a very affordable price. Suggested retail price: \$499.

Turkey hunters of all ages can have the perfect shotgun with Jr., Youth and standard versions of the **Model 870 Express Synthetic Turkey Camo**. These easy-handling pump-actions feature 21-inch vent rib Rem Choke barrels on the Youth and standard models and an 18 1/2-inch barrel on the Jr. The durable synthetic stocks and fore-ends feature the widely popular Break-Up pattern with a non-reflective black matte finish on all exposed metalwork. With three length of pull options (Jr. – 12 inches; Youth – 13 inches; and standard – 14 inches), this Model 870 Express is the ideal choice for hunters of all ages. Youth and Jr. versions are supplied with Full Choke tube and the standard version comes with Turkey Extra Full Choke. Suggested retail price: \$398.

The superior design features of the Model 870 are legendary and with over 9 million produced since its introduction in 1950, this pump action is unrivaled in the field. For a complete listing and specifications on the Model 870 family of shotguns, please visit our web site at www.remington.com.

NEW MODEL 870™ EXTRA BARREL OFFERING AIMED TOWARDS TURKEY HUNTERS

Madison, NC – With the addition of Factory Authorized Parts and Accessories, your beloved Remington® shotgun can go from the skeet field to the duck blind to the turkey woods at a fraction of the cost of a new gun. New for 2006 is the **Model 870 Super Magnum™ Turkey Barrel** clamped with all you need to transform any 12 gauge Model 870 into the ultimate turkey gun, including a special rebate offer on Remington Premier® Hevi-Shot® turkey loads.

This barrel package features an easy-handling 23-inch Rem™ Choke barrel that will fit any 12-gauge Model 870 (shell length capability depends on receiver type – see note below). Ideal for the low light conditions associated with turkey hunting, this black matte finished barrel has adjustable TruGlo® fiber-optic rifle sights and comes equipped with a specially-designed Remington Hevi-Shot Choke Tube. Optimized for impressive pattern performance, when used with Premier Hevi-Shot turkey loads, this super full choke has a diameter of 0.675" (.052 choke constriction) and is also suitable for use with lead and steel loads.

Included with the Model 870 Super Magnum Turkey Barrel clampack as an added bonus is a rebate coupon for \$10 off the purchase of Remington Premier Hevi-Shot turkey loads. The suggested retail price for the **Model 870 Super Magnum Turkey Barrel** is \$265.

To purchase this extra barrel or other Remington Factory Authorized Parts and Accessories, see your local Remington dealer or visit our web site at www.remington.com.

###

NOTE:

On Super Mag receivers, this barrel will handle 2.75, 3 or 3.5-inch shells.

On Magnum receivers, this barrel will handle 2.75 and 3-inch shells.

On standard 2.75-inch receivers, this barrel will handle 2.75-inch shells.

Hevi-Shot® is a trademark of ENVIRON-Metal, Inc. Tru-Glo® is a trademark of TruGlo, Inc.

REMINGTON INTRODUCES VERSATILE LINE OF MODEL 870™ AND MODEL 1100™ TACTICAL SHOTGUNS

Madison, NC – Remington is pleased to announce a line of 12-gauge tactical synthetic shotguns in Model 870 pump action and Model 1100 autoloading platforms. These versatile shotguns feature shorter barrel lengths, highly functional stock designs and magazine extensions for multi-purpose use including competitive shooting, personal defense or protection of property. Five durable well-designed models will be offered for 2006.

The **Model 870 Tactical SPEEDFEED® IV Stock** version is available in a **20-inch barrel length with 3-shot extension** or more compact **18-inch barrel length with 2-shot extension**. These fast-handling, pump actions feature the highly regarded SPEEDFEED IV pistol grip stock for true one-hand control and is fit with Remington's recoil-absorbing R3® Pad for added comfort when shooting magnum shells or slugs. The rugged fore-end design provides for secure and smooth operation of the action and both stock and fore-end feature a non-glare, matte black finish. A 3-shot magazine extension tube on the 20-inch model and 2-shot tube on the 18-inch model increase the shell capacity for added versatility. These tactical versions sport a standard profile, carbon steel barrel with single bead sight and fixed Improved Cylinder choke. The sturdily constructed receiver is milled from solid steel and features "870 Tactical" rollmark. Completing the package is OD (Olive Drab) matte finish on the receiver and barrel; rear swivel stud and extension bracket stud; and receiver drilled and tapped for Weaver-style rail. Suggested retail price: \$505.

The **Model 870 Tactical SpecOps™ Stock** version has an **18-inch barrel with 2-shot extension** with standard features of the 18-inch model above. Setting this tactical 870 apart is the adjustable and recoil compensating Knoxx SpecOps pistol grip stock. With an easily adjustable LOP (length of pull) feature, this pump action can almost instantaneously be fit to any shooter or adjusted to accommodate additional layers of clothing with a LOP from 12 to 16 inches. The SpecOps Stock also utilizes a patented recoil-compensating system with significant reduction of felt recoil up to 95%. Not only does this make shooting more comfortable, but it allows for quicker follow-up shots and less shooter fatigue. Suggested retail price: \$625.

The **Model 1100 Tactical SPEEDFEED IV Stock** version is available in an **18-inch barrel length with 2-shot extension**. This softer-recoiling, 12-gauge autoloader has the sturdy SPEEDFEED IV pistol grip-style stock and fore-end, solidly constructed of durable synthetic materials and finished in a non-glare matte black. The standard profile, carbon steel barrel has a single bead sight, fixed Improved Cylinder choke and OD matte finish. Shotshell capacity of 6+1 is achieved with the 2-shot magazine extension tube and with the addition of an extended carrier release and oversized operating handle reloading is quick and easy. The solid steel receiver is drilled and tapped for Weaver rail and features the OD finish with "1100 Tactical" rollmark. Rear swivel stud, extension bracket stud and recoil-taming R3 Recoil Pad complete this offering. Suggested retail price: \$757.

(cont'd)

**REMINGTON INTRODUCES VERSATILE LINE OF MODEL 870™
 AND MODEL 1100™ TACTICAL SHOTGUNS (CONT'D)**

The Model 1100 Tactical Standard Stock version is offered in a 22-inch barrel length with 4-shot extension. For the competitive shooter who has lamented the absence of the Model 1100 Competition Master, this 8+1 capacity autoloader fills the void. Sporting a traditional Model 1100 black synthetic stock and fore-end, this 12-gauge is designed for versatility, easy-handling and quick response. The oversized operating handle and extended carrier release provide for rapid and easy reloading. The 22-inch vent rib Rem® Choke, standard contour barrel comes equipped with Full, Modified and Improved Cylinder chokes for maximizing shotshell performance. Front fiber optic sight and steel mid bead sight provide for easy target acquisition and quick follow-up shots. This Model 1100 receiver wears the Tactical rollmark and is drilled and tapped for Weaver-style rail. Like the other members of this family, the barrel and receiver have the matte OD finish; the stock is fit with the R3 Recoil Pad; and swivel studs provide for easy attachment of a sling. Suggested retail price: \$799

For complete specifications on these Tactical 12-gauge shotguns and Remington's expansive offerings of pump-action, autoloading and break-action shotguns, please visit our web site at www.remington.com.

REMINGTON INTRODUCES THREE NRA™ LICENSED FIREARMS TO SUPPORT EDUCATION AND CONSERVATION INITIATIVES

Madison, NC – Working in conjunction with the National Rifle Association (NRA), Remington announces three officially licensed, NRA Edition firearms – the **Model 870™ Wingmaster®**, the **Model 11-87™ Sportsman®** and the **Model 552™ BDL™ Deluxe Speedmaster®**. Each special edition firearm will feature the NRA logo and NRA prefix serial number. Remington will donate a portion of each sale from these firearms to the NRA in support of their established programs in Firearm Safety, Marksmanship, Personal Safety, Hunting and Natural Resource Conservation.

Model 870 Wingmaster NRA Edition – This 12-gauge, 3 inch pump-action is the flagship member of the reliable and durable Model 870 family of shotguns. Featuring a handsome high gloss finish, the stock and fore-end are constructed of American walnut and have generous machine-cut checkering. The solidly built receiver and 28-inch vent rib, Rem™ Choke barrel are richly finished with a high polished sheen. Enhancing this special edition Model 870 is a fine line engraving of the NRA Heritage logo and the “NRA” prefix serial number on the left receiver panel. The traditional “NRA” logo is engraved on the right receiver panel. Beyond the handsome appearance of this fine gun, are the venerable and durable design features of the Model 870 – America’s most popular pump-action shotgun. Suggested retail price: \$685.

Model 11-87 Sportsman NRA Edition – The Sportsman series, new to the family of Model 11-87 shotguns, is a durable field version of our versatile autoloader featuring weather-resistant synthetic stock and fore-end with a non-reflective black matte finish on exposed metalwork. The 12-gauge, 3-inch NRA Edition is distinctive with its Mossy Oak® New Break-Up® camouflaged synthetic stock and fore-end, “NRA” traditional logo and special “NRA” serial number rolled on the shooter’s left panel of the receiver. Ready for the dove field or duck blind, this reliable, gas-compensating shotgun has a 28-inch vent rib, Rem Choke barrel equipped with a Modified choke tube and stock swivel and magazine cap studs for sling attachment. Suggested retail price: \$665.

Model 552 BDL Deluxe Speedmaster NRA Edition – This classically-designed rimfire rifle has been a member of the Remington family since 1957 and is the only American-made autoloader of its kind. Its unique tubular magazine will hold Short (20), Long (17) and Long Rifle (15) cartridges, making this rimfire ideal for the serious plinker, new shooter or small game hunter. The American walnut stock features generous checkering with high gloss finish and the carbon steel barrel and solid steel receiver have a rich, blued finish. The 21-inch barrel has adjustable, big-game iron sights and the receiver is grooved for the addition of optics. This classic rimfire also has a positive cross-bolt safety. Like the Wingmaster, this special edition Model 552 has the NRA Heritage logo laser etched on the receiver’s left panel with accompanying “NRA” prefix serial number and the standard “NRA” logo is etched on the right side. Suggested retail price: \$519.

These finely-crafted NRA Edition Remington firearms will be available third quarter of 2005. For further information about these and other reliable Remington products, please visit our web site at www.remington.com

REMINGTON INTRODUCES NEW LIMITED EDITION CENTERFIRE RIFLE SERIES - MODEL 700™ CDL™ SF™ LIMITED

Madison, NC – Remington is pleased to announce the first offering in a new limited edition Model 700 collectible series – the **2006 Model 700 CDL SF (Stainless Fluted) Limited**. In celebration of the 100th Anniversary of the cartridge, this CDL Limited will be chambered in .30-06 Springfield. Commemorative engraving and limited production quantities will add to the collectible value of this new multi-year series.

The introduction of the traditionally-styled Model 700 CDL (Classic Deluxe) in 2004 was a welcome addition to the legendary family of Model 700 bolt action rifles. The CDL combines the handsome appearance of a classic walnut stock rifle with the rigid, highly accurate Model 700 cylindrical receiver design. The new Stainless Fluted Limited offering takes this traditional hunting rifle to a new level.

The Model 700 CDL SF Limited is housed in a satin finished, straight comb American walnut stock with right-handed cheek piece. Enhancing the classic look of the stock are generous cut checkering, black fore-end tip and grip cap. The durable, satin finished 416 stainless fluted barreled action, engraving on the hinged floorplate denoting the 100th anniversary of the .30-06 cartridge and “Model 700 Limited” rollmark on the receiver, set this limited edition CDL apart from the standard offering. Other features include clean 24-inch, hammer-forged barrel; jeweled bolt; four round magazine capacity; recoil-softening R3® Pad; and sling swivel studs.

Whether taken afield or displayed proudly in your gun cabinet, the **2006 Model 700 CDL SF Limited** chambered in the acclaimed .30-06 Springfield is a requisite addition to your gun collection. Following in the footsteps of the 25th and final Model 700 Classic offering, the Model 700 CDL Limited will be available for one year only at a suggested retail price of \$863.

ADDITIONAL CALIBER OFFERINGS NOW AVAILABLE IN STAINLESS VERSION OF REMINGTON® MODEL 700™ SPS™

Madison, NC – Remington is pleased to announce the addition of five new centerfire offerings to the affordable line of high performance **Model 700 SPS (Special Purpose Synthetic) Stainless** bolt action rifles. New chamberings for 2006 include 204 Ruger, 223 Rem, .22-250 Rem, .308 Win and .300 Rem Ultra Mag. With the 2005 mid-year introductions of the .25-06, .270 WSM and .300 WSM offerings, the Model 700 SPS Stainless family now includes 14 popular chamberings.

The Model 700 SPS Stainless rifle features a weather resistant, black synthetic stock with defined grips for improved handling. Completing this sturdy, well-designed stock is the addition of the recoil-reducing R3® Recoil Pad and sling swivel studs. Short action versions feature a clean 24-inch matte finished barrel and the .300 Ultra Magnum version sports a 26-inch barrel. For added durability in the field, the barreled action is constructed of 416 stainless steel and fire control components are plated. The receivers are drilled and tapped for ease of scope attachment.

Built on the highly accurate Model 700 platform, famous for its “three-rings-of-steel” design, these full-featured bolt action rifles deliver in performance at a surprisingly affordable price. The **Model 700 SPS Stainless** is available at a suggested retail price of \$613.

For a complete listing of the SPS family including Youth and detachable magazine versions, please visit our web site at www.remington.com or visit your local Remington dealer.

REMINGTON CONTINUES THE ELK FOUNDATION COMMEMORATIVE RIFLE SERIES WITH SIXTH OFFERING

Madison, NC – For 2006, Remington will offer the **Model 700 XCR Rocky Mountain Elk Foundation (RMEF) Camo** rifle in .300 WSM – its sixth offering in this limited edition series. The rugged durability of the Xtreme Conditions Rifle (XCR) and the effectiveness of a short action magnum chambering are the perfect match for the ever-changing climate and harsh terrain associated with elk hunting. As with previous RMEF offerings, Remington will donate a portion of the proceeds from the sale of this rifle to RMEF in support of their elk reintroduction projects and conservation efforts.

Introduced in 2005, the Model 700 XCR bolt action may possibly be the most durable production rifle available. Utilizing the patented TriNyte™ Corrosion Control System process, the stainless steel barreled action undergoes a multi-step process including electroless nickel plating and Physical Vapor Deposition (PVD) coating with zirconium nitride to provide a thin armor-like, sleek coating which is virtually weather and scratch-resistant. For added protection against the elements, the fire control components of this Model 700 are nickel plated as well.

The RMEF rifle has two unique features setting it apart from the standard Model 700 XCR rifle - the Elk Foundation logo is engraved on the hinged floorplate and the easy-grip, overmolded stock is fully camouflaged in Realtree® Hardwoods® Gray HD™. Other features include clean 24-inch barrel; solid steel receiver that is drilled and tapped; hinged floorplate with three + one capacity; sling swivel studs; and the recoil-reducing R3® Recoil Pad.

Previous chamberings in this commemorative series have included .300 Rem Ultra Mag, 7mm Rem Ultra Mag, .300 Rem Short Action Ultra Mag, .300 Win Mag and the current offering in 7mm Rem Mag. The sixth annual Model 700 XCR RMEF Camo rifle in .300 WSM will be available for one year only at a suggested retail price of \$993.

Model	700 RMEF Camo

BACK BY POPULAR DEMAND REMINGTON® MODEL 700™ SENDERO® SF™ RETURNS TO SPECIALTY RIFLE LINE-UP

Madison, NC – With the overwhelming response to the absence of a heavy barreled, magnum bolt action rifle, Remington is proud to re-introduce the Model 700 Sendero in an updated version for 2006. The **Model 700 Sendero SF II** will be offered in five hard-hitting, flat-shooting magnum calibers including .264 Win Mag (a reintroduction to Model 700 chamberings), 7mm Rem Mag, .300 Win Mag, 7mm Rem Ultra Mag and .300 Rem Ultra Mag.

Following on the successful launch of the upgraded VS™ (Varmint Synthetic) line last year, the Model 700 Sendero SF II wears a similarly redesigned H.S. Precision black composite stock, distinctive with its gray webbed finish. The addition of a full length aluminum bedding block provides rigid action support for consistent shot placement. An enhanced grip with ambidextrous palm swell and dual swivel studs on the fore-end for the easy attachment of sling and bipod are also incorporated in the redesign.

The varmint style, heavy contour 26-inch barrel is constructed of 416 stainless steel with concave target-style crown and features six longitudinal flutes. Both the solid steel receiver and hammer-forged, fluted barrel have a spin polished finish. The heat-dissipating flutes are accented with a black powder-coat finish. Completing this Model 700 is a hinged floorplate magazine with three plus one capacity and receiver drilled and tapped for scope mounts.

At the core of the Sendero is the legendary performance of the Model 700 bolt action platform. Crisp trigger, exceptionally fast lock time and rigid cylindrical receiver design further enhance this Model 700 rifle's accuracy.

For the dedicated long-range hunter or precision shooter, the redesigned **Model 700 Sendero SF II** is the ideal high performance, bolt action rifle. Available at a suggested retail price of \$1085.

Model	700 Sendero SF II
Action	Bolt/Magnum Long

SHORT ACTION CARTRIDGE OFFERING IN YOUTH AND STANDARD VERSIONS JOIN AFFORDABLE REMINGTON® MODEL 710™ BOLT ACTION LINE-UP

Madison, NC – Since its highly successful launch in 2001, the Model 710 bolt-action rifle has set the bar for value-packed, moderately priced firearms. This affordable and well-designed line of rifles was upgraded in 2005 with an all steel receiver for the same suggested retail price of \$426. Now Remington is pleased to announce the addition of a popular short action cartridge offering for 2006 - .243 Win in standard and Youth versions. These state-of-the-art centerfire rifles are topped with a bore-sighted 3-9x40 scope, making this package an exceptional value.

The Model 710 rifle design features an all steel receiver for durable and smooth bolt operation; 22-inch button-rifled, carbon steel clean barrel with satin blued finish; unique bolt to barrel lock-up; and gray textured, weatherproof synthetic stock. The all steel bolt operates with a 60-degree throw for more efficient cycling and when fully engaged in the forward position, it locks securely inside the barrel for unprecedented strength. Additionally, the Model 710 rifle has a detachable, center-feed steel magazine box with four round capacity. Completing this value-packed offering is a factory bore-sighted 3-9x40 black matte scope, mounted with heavy-duty Weaver-style bases and rings.

The Youth version has a 12 ³/₈-inch length of pull (1-inch shorter than standard model) and more compact 20-inch barrel for easy-handling by the young hunter or smaller stature adult.

The innovative Model 710 design and efficient manufacturing process are a result of the joint efforts of Remington's freestanding R & D facility in Elizabethtown, Kentucky, and its technologically advanced manufacturing facility in Mayfield, Kentucky. Remington continues to be a leader in bringing cutting-edge products to the marketplace.

Whether you are a small game or varmint hunter, avid whitetail hunter or pursuing that trophy elk, the reliable and accurate Model 710 family of bolt-actions has a rifle to meet your needs at an affordable price. The new Model 710 chambered in .243 Win is available at a suggested retail price of \$426.

**NEW CLASSIC DELUXE VERSION OF REMINGTON® MODEL SEVEN™
INTRODUCED IN FULL RANGE OF CALIBER OFFERINGS**

Madison, NC – The fast-handling, short action Model Seven rifle is now available in the classically-styled CDL™ platform in standard and short action magnum offerings. For 2006, this newest member of the Model Seven family will be offered in .204 Ruger, .223 Rem, .22-250 Rem, .243 Win, .260 Rem, 6.8mm Rem SPC, 7mm-08 Rem, .308 Win and magnum chamberings include .270 WSM, 7mm Rem SA Ultra Mag, .300 WSM, .300 Rem SA Ultra Mag and .350 Rem Mag. The broadest line of short action bolt offerings in the marketplace today.

Based on the legendary design and strength of the Model 700™ bolt action, the Model Seven is revered for its unprecedented accuracy, dependability, compact length and precision balance. Whether hunting in dense cover, trekking through mountainous terrain or sitting in your treestand, the Model Seven delivers unparalleled performance in a true short action rifle.

The **Model Seven CDL** combines performance and durability in a traditional American walnut, straight comb stock with right hand cheek piece. The stock is accented with black fore-end tip and grip cap, handsome cut checkering and satin finish. Standard offerings feature a clean 20-inch barrel and magnum calibers sport a longer 22-inch clean barrel (.350 Rem Mag has more compact 20-inch barrel with rifle sights) with target crown. The metalwork has a non-glare, satin blued finish and the jeweled bolt handle compliment the classic style of the stock. Hinged floorplate magazines (5+1 capacity for .204 Ruger and .223 Rem; 4+1 for short actions and 3+1 for short action magnums); sling swivel studs; and revolutionary, recoil-taming R3® Recoil Pad complete this well-designed package.

The **Model Seven CDL** and the **Model Seven CDL Magnum** are the ideal short action rifles, regardless of the prey or the hunting conditions. Suggested retail price: \$769 to \$796.

REMINGTON INTRODUCES NEW AUTOLOADING CENTERFIRE RIFLE - THE MODEL 750™ WOODSMASTER™

Madison, NC – Remington has a long history of designing and building reliable and fast-handling autoloading centerfire rifles and the newest member of this elite family is the **Model 750 Woodsmaster**. For 2006, this redesigned, gas-operating autoloader will be chambered in five popular calibers - .243 Win, .308 Win, .270 Win, .30-06 and .35 Whelen with carbine versions of .308 Win, .30-06 and .35 Whelen available.

Remington introduced the first autoloading centerfire rifle to the U.S. marketplace in 1906 but with manufacturing and design advancements, the Model 8 was soon replaced with a succession of popular Remington® autoloading rifles from the Model 740, Model 742 and Model Four to the venerable Model 7400™ which is still available today in a durable synthetic offering.

The **Model 750 Woodsmaster** combines cosmetic and performance enhancements with the time-proven design features of its predecessor, the Model 7400. To improve the reliability and smooth operation of this autoloading rifle, the gas system has been modified to provide more consistent bolt velocities, less fouling and greater feeding reliability. To further improve feeding and reduce friction, the breech bolt has an electroless nickel and Teflon® coating. The four-round capacity, detachable magazine box is interchangeable with the Model 7400 magazine box and the Woodsmaster is drilled and tapped to accept standard Model 7400 bases.

Not only does the Model 750 sport internal changes; the exterior has been updated as well for a more modern look. The stock and fore-end have a satin finish and are constructed from solid American walnut. The fore-end has a semi-beavertail design, features the Remington “R” logo and handsome cut checkering. The Monte Carlo stock has a lower comb than the Model 7400 and features the recoiling-reducing R3® Pad; black grip cap; and sling swivel studs which complete this well-designed centerfire rifle. The solidly-built steel receiver and hammer-forged, carbon steel barrel feature a complimenting high gloss blued finish. The standard 22 and 18 1/2-inch carbine barrels feature iron sights for added versatility.

Respected for their durability, quick follow-up shots and fast target acquisition, Remington’s soft-recoiling autoloading rifles have long been a favorite of deer hunters nationwide. The **Model 750 Woodsmaster** will continue that honored tradition. Available at a suggested retail of \$732.

Model	750 Woodsmaster
Action	Autoloader
BBL Length	22 inches, 18 1/2 inches (carbine)
Overall Length	42 5/8 inches, 39 1/8 inches
Avg. Weight	7 1/2 lbs., 7 1/4 lbs.
Stock Material	American Walnut
Stock Finish	Satin
BBL Material	Carbon Steel

REMINGTON ANNOUNCES RETURN TO THE WORLD OF BLACK POWDER WITH THE LAUNCH OF THE GENESIS™ MUZZLELOADER

Madison, NC – Black powder hunting is being taken to the next level with the introduction of Remington's innovative Genesis Muzzleloader. Available in seven initial offerings, this revolutionary .50 caliber black powder rifle breaks the mold of traditional in-lines by being "Easy to Use, Easy to Load and Easy to Clean." Like nothing in the marketplace today, the Genesis muzzleloading rifle is poised to transform black powder hunting into a more effective, reliable and enjoyable pastime.

Remington revolutionized the world of in-line black powder muzzleloading with the Model 700™ muzzleloader's state-of-the-art design and unprecedented performance, when introduced in 1996. However, conspicuously absent since leaving the black powder world in 2004, the launch of the Genesis ML brings Remington fully back into a category in which they have been a dominant player throughout their 190 year history.

At the core of the Genesis ML is the Torch™ Cam breech block and reliable 209 primer ignition. The camming breech block provides easy access to the breech plug for quick placement and removal of the 209 primer without the assistance of a tool. The Torch cam breech block also protects the ignition system from inclement weather and isolates the trigger group from blowback and fouling. Removable breech plug and firing pin provide added reliability and ease of cleaning or replacement. Maximum efficiency and greater velocities can be obtained with the longer 28-inch barrel, optimized with one-in-28 inch twist rate, and the capability to use up to 150 grains of black powder or black powder equivalent. For added versatility, the Genesis ML is drilled and tapped for scope mounts and features Williams Fiber Optic Adjustable Sights. An ambidextrous hammer spur can be installed, if using a scope, for easier access. The dual safety system incorporates a traditional cross bolt safety at the rear of the trigger and manual hammer that locks in the cocked position. Addition of front and rear swivel studs and handy aluminum anodized ramrod with jag complete the basic Genesis package.

Maintenance of black powder rifles is the essential key to their reliability. The unique design of the Genesis ML allows for easy breakdown and cleaning of the entire rifle with the removal of only a few hex screws. The easily-removable breech plug also aids in the cleaning process, allowing the rifle to be stripped and cleaned in the field, if necessary.

Another key in the world of black powder hunting is affordability. With seven stock designs and choice of barrel finishes including blued or camouflaged carbon steel and satin stainless, the family of Genesis muzzleloaders has a rifle option for the entry-level shooter up to the dedicated black powder enthusiast.

REMINGTON ANNOUNCES FOUR BOLT ACTION RIFLES IN 6.8MM REM SPC CHAMBERING FOR 2006

Madison, NC – Hunters were introduced to the high performance, flat-shooting 6.8mm Rem SPC centerfire cartridge shortly after its unveiling to the military world in the fall of 2003. Based off the 30 Remington case, this well-designed intermediate length cartridge offers a superb combination of velocity, low recoil and effective on-game performance for medium-sized game. For 2006 Remington will be offering this exciting, high performance cartridge in three **Model Seven™** platforms including a Youth version and in the durable **Model 700™ SPS™** offering. All four rifle offerings are drilled and tapped for scope mounts, feature sling swivel studs and hinged floorplate magazines with four plus one capacity.

Model Seven CDL™ (Classic Deluxe) – New for 2006, this classically-styled, compact bolt action has a traditional American walnut, straight comb stock with right hand cheekpiece and is accented with black fore-end tip and grip cap, handsome cut checkering and satin finish. This easy-handling rifle features a clean 20-inch barrel with target crown and all exposed metalwork has a non-glare, satin blued finish. Addition of the revolutionary, recoil-taming R3® Recoil Pad with patented Limbsaver® technology further reduces the felt recoil of this soft-shooting cartridge. Suggested retail price: \$788.

Model Seven SS (Stainless Synthetic) – Ideal for all hunting conditions, this durable version of the Model Seven rifle features a weather-resistant, black synthetic stock and 416 stainless steel barreled action. With clean 20-inch barrel, this compact lightweight rifle is at home in dense cover or in open fields. Suggested retail price: \$811.

Model Seven Youth Synthetic – Combining the low-recoiling 6.8mm Rem SPC chambering with the Model Seven Youth platform results in the ultimate deer hunting rifle for smaller stature hunters. This youth version features a rugged, charcoal gray synthetic stock which is equipped with the amazing Remington R3 Recoil Pad and textured grips for improved handling and comfort. One-inch shorter LOP (length of pull) and compact 20-inch barrel complete this easy-handling package. Suggested retail price: \$595.

Model 700 SPS (Special Purpose Synthetic) – Introduced in 2005, this value-priced synthetic version of the venerable Model 700 features a newly redesigned, more ergonomically appealing black synthetic stock with recoil-reducing R3 Recoil pad. The clean 24-inch barrel has a matte blued finish. Suggested retail price: \$532.

Combining the well-balanced 6.8mm Rem SPC cartridge with the “out-of-the-box” accuracy of Remington’s bolt action rifles, provides hunters of all ages with unmatched medium sized game performance in a low-recoiling package. For complete specifications on these new 6.8mm Remington SPC rifle offerings and other Remington products, please visit our web site at www.remington.com.

REMINGTON® MANAGED-RECOIL™ BUCKHAMMER® NOW AVAILABLE IN 20 GAUGE

Madison, NC – It's been an accepted fact that shotgun slugs produce considerable recoil. Remington's recent introduction of the Managed-Recoil BuckHammer in 12ga established a completely new category within the world of high-performance shotgun slugs. Never before were the words comfort and performance used when describing shotgun slugs. For 2006, the newest member of the Remington pioneered Managed-Recoil family is now available in a 20ga. 2³/₄" version for even milder recoil.

Remington Managed-Recoil BuckHammer is designed to significantly cut felt recoil by at least 40%. The dramatic reduction in recoil is accomplished by reducing the slug weight and load velocity while maintaining deadly on-game performance. Full-power BuckHammer 20ga loads deliver deer-dropping energy out to 125 yards while Managed-Recoil BuckHammer 20ga loads provide sufficient power out to 100 yards, well within normal whitetail hunting ranges. When used in conjunction with a fully rifled barrel, Remington Managed-Recoil BuckHammer delivers groups under 4" at 100 yards.

This specialized Remington slug system, with its uniquely engineered BuckHammer slug and attached, stabilizing wad, delivers outstanding accuracy, near 100% weight retention and controlled expansion to nearly 1 inch in diameter. These attributes combine to produce the most devastating lead slug available to hunters today.

Laboratory testing has proven the Remington BuckHammer slug system outperforms the competition in reliable expansion and accuracy when temperatures drop below just 30°F. Competitive slug sabots have been proven to fracture and come apart in freezing temperatures, totally destroying accuracy. The Remington BuckHammer's attached wad stays fully intact and maintains accuracy in temperatures as cold as -20°F. **What's the temperature in your area during deer season?**

Now, hunters of all ages can actually enjoy the necessary ritual of those pre-hunt practice sessions. Remington Managed-Recoil BuckHammer will build confidence on the range and still deliver devastating performance when it really counts!

Remington Managed-Recoil ammunition delivers- Lower Recoil-Greater Confidence™!

Offerings for 2006 are as follows:

Nitro Turkey Magnum Loads - Buffered

	Gauge	Shell Length	Payload	Velocity	Muzzle Energy
	12 ga.	2 3/4"	1 1/8 oz.	1350 fps	2000 ft-lbs.
New	20 ga.	2 3/4"	7/8 oz.	1275 fps	1379 ft-lbs.

REMINGTON EXPANDS ITS AWARD WINNING CATEGORY OF MANAGED-RECOIL™ CENTERFIRE RIFLE AMMUNITION

Madison, NC – More hunters have cut their teeth in the woods and on the range with the 30-30 Win. than any other centerfire rifle cartridge. Although the 30-30 Win is not generally thought of as a heavy-recoiling cartridge, in the hands of a young hunter, the lightweight lever-action rifles with hard metal butt plates can make for a very unpleasant start to a shooting career. For 2006, Remington has expanded its innovative line of Managed-Recoil centerfire rifle ammunition to include the ever-popular 30-30 Win.

Remington Managed-Recoil ammunition has established a new category of performance-based low-recoil ammunition, available in the most popular big-game cartridges. Managed-Recoil ammunition delivers fully effective hunting performance with less than 50% of the recoil of standard cartridges. Now shooters of all experience levels can spend time on the range or in the field without the discomfort of stiff recoil. Hunters can rely on the benefits provided by a managed recoil product that delivers comfort, confidence, and most importantly, reliable on-game performance.

Remington's Managed-Recoil Ammunition succeeds where other recoil control ammunition fails. Competitive attempts at curbing recoil have focused solely on reducing the amount of gunpowder while using the same heavyweight bullets as their standard loads, which compromises the trajectory and energy levels available. Only Remington's Managed-Recoil ammunition focuses on the entire cartridge by combining select propellants and a specially designed Core-Lokt® bullet built for optimum energy and 2x expansion with 85% weight retention at lower velocities.

Additionally, Managed-Recoil ammunition is engineered to impact the target within 2" of a standard cartridge at 100 yards. This feature means hunters transitioning between Managed-Recoil and standard loads will require little to no scope adjustment on their rifles.

Remington Managed-Recoil ammunition delivers – Half the Recoil...Twice the Confidence!

Remington Managed Recoil

2006 offerings:

REMINGTON® MANAGED-RECOIL™ STS® TARGET LOADS - A PLEASURE TO SHOOT FOR THE ULTIMATE IN CONFIDENCE

Madison, NC – All shooters, regardless of skill level or body stature are affected by the negative consequences of recoil. New for 2006, Remington has expanded its award-winning line of Managed-Recoil ammunition to include Remington Managed-Recoil STS Target loads. Available in 12 and 20 ga versions, Remington Premier STS Managed-Recoil shotshells are the softest shooting target loads we've ever made.

Shooting clay targets – whether “out in the back forty”, at summer camp or at a local gun club – is where most beginners first experience the thrill of handling a shotgun. Many shooters can recall their first experience firing a shotgun, not because of the thrill of seeing that clay bird burst into a cloud of smoke; they remember the unexpected kick of the shotgun!

With up to 40% less recoil than standard target loads, Remington Managed-Recoil STS Target loads provide new participants with a more enjoyable and exciting entry into the world of shooting and hunting. The ability to focus on the shot, and not the recoil, is the first step to becoming a confident and successful shooter.

Remington Managed-Recoil STS Target loads feature the same quality components that have won the trust of more avid clay target shooters than any other brand of shotshell ammunition. Remington STS target loads are famous for their “reloader friendly” hull design, reliable 209P STS primer and STS magnum target-grade shot that result in unbeatable performance with absolute reliability.

Whether you are a backyard clay buster or an experienced competitor, the positive effects of Remington Managed-Recoil STS shotshells will make you a better shooter.

Remington Managed-Recoil ammunition delivers - **Lower Recoil – Greater Confidence™**

Offerings for 2006 are as follows:

Remington Managed Recoil STS Target Loads

	Gauge	Shell Length	Weight	Velocity
New	12 ga.	2 3/4"	7/8 oz.	1100 fps
New	12 ga.	2 3/4"	7/8 oz.	1100 fps

THE REMINGTON® ULTRA MAGNUM FAMILY STILL OUT-PERFORMING THE COMPETITION

Madison, NC – Since their inception, Remington has continuously refined its family of legendary Ultra Magnums to create the most complete line of magnum cartridges available to today's big game hunters. For 2006, the Premier Scirocco Bonded line will feature a 7mm Remington Ultra Magnum with a 150 grain bullet. Additionally, Remington will offer Premier A-Frame loadings in the 7mm Remington Ultra Magnum with 175 grain bullet, and the category leading 300 Ultra Magnum with a heavyweight 200 grain bullet..

In 1999 Remington made ammunition history with the introduction of the 300 Remington Ultra Magnum. A new breed of cartridge, the 300 Ultra Mag delivers the highest velocity and energy, with the flattest trajectory available in a commercial non-belted magnum. This high-performance design set the stage for an entire family of Ultra Magnum cartridges to provide hunters with the ultimate combination of ballistic and terminal performance. The velocity and energy levels generated within the Remington Ultra Magnums are a result of their innovative case design which dramatically maximizes powder capacity to drive bullets at previously unknown hunting cartridge velocities. The non-belted, large diameter case is head-spaced from the shoulder like traditional rimless cartridges, which improves alignment of the cartridge and the rifle bore and results in increased accuracy.

Whether it's long-range whitetails, moose in the woodlands, or up close and personal brown bear, from North America to Africa, Remington makes an Ultra Magnum cartridge just for you. The Ultra Mag family features 4 calibers loaded with four different bullet styles in multiple grain weights. What ever your quarry, Remington's Ultra Magnums set the standard for big game performance. More details on the line up follow:

7mm Remington Ultra Magnum: One of the flattest shooting big game cartridges on the planet. The 7mm Remington Ultra Magnum provides big game hunters with trajectory levels previously delivered only by light-weight varmint calibers. At 24 percent more energy than the 7mm Remington Magnum and 12 percent more energy than the 7mm STW, the 7mm Remington Ultra Magnum will prove to be the perfect solution for medium and long range deer and elk hunting.

.300 Remington Ultra Magnum: Arguably the most versatile member of the Ultra Magnum family, the .300 Remington Ultra Magnum delivers a 180 grain .30 caliber bullet at greater velocities and energies than any other factory loaded .30 caliber magnum. With 13 percent more case capacity than the .300 Weatherby Magnum and 20 percent more than the .300 Winchester Magnum, the .300 Remington Ultra Magnum is capable of sending heavy bullets downrange at a sizzling muzzle velocity of 3300 fps with a 26-inch barrel. Sighting in the .300 Remington Ultra Magnum just two inches high at 100 yards delivers the bullet at less than three inches low at 300 yards. For hunters that prefer a .30 caliber projectile, the .300 Remington Ultra Magnum is at home on game fields anywhere in the world.

THE REMINGTON® ULTRA MAGNUM FAMILY STILL OUT-PERFORMING THE COMPETITION (CONT'D)

.338 Remington Ultra Magnum: If elk, bear or moose are in your hunting plans, the .338 Remington Ultra Magnum provides one of the most powerful .338 caliber rounds available. This cartridge projects a 250-grain bullet a full 200-fps faster than the .338 Winchester Magnum. Zeroed at 200 yards, the .338 Remington Ultra Magnum drops two inches less than the .338 Win Mag at 300 yards and retains a flatter trajectory all the way out to 500 yards. Even more astonishing than its flat trajectory is the enormous energy generated from the .338 Remington Ultra Magnum. The .338 Remington Ultra Magnum generates over 600 ft/lbs more muzzle energy than the .338 Win Mag and an incredible 20% more ft/lbs of energy at 300 yards. Even out to 500 yards, the .338 Remington Ultra Magnum has almost 300 more ft/lbs of energy than the .338 Winchester Magnum.

.375 Remington Ultra Magnum: One of the most powerful centerfire rounds offered by Remington Arms Company. This cartridge delivers the massive energies needed for dangerous game from Alaska to Africa. The .375 Remington Ultra Magnum delivers a 270-grain projectile at 2900 fps with an astonishing 5041 ft/lbs. of energy. That's over 700 ft/lbs. more energy than the .375 H & H Magnum. For devastating knockdown power, "when it really counts," the new .375 Remington Ultra Magnum is now the perfect choice.

Remington Ultra Magnum a revolution in high-performance big game ammunition.

REMINGTON® PREMIER® ACCUTIP™
THE MOST ACCURATE RAPID EXPANSION AMMUNITION AVAILABLE

Madison, NC – Remington Premier AccuTip ammunition has become the go-to ammunition for hunters seeking the ultimate in accuracy and down-range performance when hunting thin-skinned big game. New for 2006, the Remington Premier AccuTip category has expanded to include 7mm Remington Magnum 140 grain, 30-06 Springfield 180 grain, 270 WSM 150 grain and 300 WSM 180 grain.

Remington Premier AccuTip ammunition features a precision engineered polymer tipped bullet that is designed for sub minute-of-angle accuracy at 100 yards. The polymer tipped nose and secant ogive profile produce an extremely high ballistic coefficient that flattens trajectory and preserves down range energy. The copper jacket is specifically constructed, under a proprietary manufacturing process to deliver more progressive expansion and improved weight retention than other tipped hunting bullets. These performance characteristics, coupled with the superior down-range energy, make it a perfect choice for medium-size big game such as whitetail, mule deer and antelope.

Remington Premier AccuTip ammunition is offered in today's most popular calibers and grain weights.

Offerings for 2006:

Remington Premier AccuTip

	Caliber	Bullet Weight
	243 Winchester	95 Grain
	260 Remington	120 Grain
	270 Winchester	130 Grain
	280 Remington	140 Grain

REMINGTON® KLEANBORE® MUZZLELOADING PRIMERS - A WELCOME INNOVATION TO THE WORLD OF MUZZLELOADING

Madison, NC – Over the past decade, the art of muzzleloading has evolved more rapidly than any other hunting discipline. The design and function of rifles, projectiles and propellants have been optimized to deliver top performance to today's modern hunter. Now, Remington Kleanbore Muzzleloading Primers have quite possibly put the finishing touch on muzzleloader evolution, while dramatically reducing one of the most annoying aspects of shooting muzzleloaders – cleaning.

Specifically engineered for muzzleloading powders, Remington Kleanbore Muzzleloading Primers are the cleanest-burning form of ignition available to the shooter and are designed to deliver the following performance advantages:

- Dramatically Reduced Chamber Fouling
- Easier, Quicker Bullet Seating for Second Shots
- From 2x to 15x More Shots Possible Between Cleanings
- More Consistent, Reliable Ignition
- Works Equally Well With Loose Powder and Pellets

Ask any hunter and they will tell you that muzzleloading is one of the most enjoyable and satisfying forms of hunting. But, they will also tell you that cleaning their rifles is no fun at all. Remington Kleanbore Muzzleloading Primers definitely allow you to shoot more and clean less!

REMINGTON® AMMUNITION CONTINUES TO DOMINATE THE GRAND AMERICAN! “THE START OF AN ERA”

Madison, NC – For the third year in a row, Remington Premier® STS® and Premier® Nitro 27® blew away the competition by dominating the ATA's Grand American World Trapshooting Championships. Shooters that put their trust and confidence in Remington shotshells were rewarded by taking home more trophies than competitors using any other brand of ammunition.

Not only did Remington shotshells account for more trophies, sales figures revealed that shooters, once again, preferred Premier STS and Premier Nitro 27 ammunition by an overwhelming majority over all available brands of ammunition at the 2005 “Grand”.

Shooters at the Grand American are required to purchase all their ammunition on site, thus creating an even playing field. Competitors are also given the choice of three major brands, all at the same purchase price. This procedure allows the shooter to purchase and compete with the brand of ammunition in which they have complete confidence. Once again, Remington was clearly the “Ammunition of Choice” at this year's event!

Competitive trap shooters realize their ammunition of choice must exhibit unbeatable performance and absolute reliability. When one clay target can mean the difference between earning a championship trophy, or going home empty handed, Remington Premier STS and Premier Nitro 27 provide shooters with design and performance features that result in a distinctive competitive advantage.

Remington ammunition engineers have recently taken several steps to improve upon the Premier Nitro 27, establishing it at the pinnacle of clay target ammunition technology. The New Improved Premier Nitro 27 load features a new powder formulation, a different wad, and an improved primer resulting in even softer felt recoil, better pattern performance, and more consistent handicap velocities.

There is no question that Premier STS and Premier Nitro 27 are the only choice for serious shooters and have established “The Start of an Era” of domination in competition-level clay shooting.

REMINGTON INTRODUCES NITRO TURKEY™ MAGNUM LEAD LOADS

Madison, NC – Many of today's most accomplished turkey hunters still prefer the tried-and-true performance of lead shot. Remington's new Nitro Turkey Loads offer hunters a high performance lead load at a very affordable price.

Remington® Nitro Turkey loads contain our Nitro Mag® extra-hard lead shot. Our unique manufacturing process yields shot that is as hard and round as copper-plated shot. In fact, Nitro Turkey Magnums will pattern as well as other copper-plated, buffered loads without the higher cost.

Utilizing a specially blended powder recipe and Remington's advanced Power Piston® one-piece wad, Remington's Nitro Turkey Load delivers a full 1 7/8 oz. payload at 1210 fps while delivering 80% pattern densities with outstanding knockdown power at effective ranges.

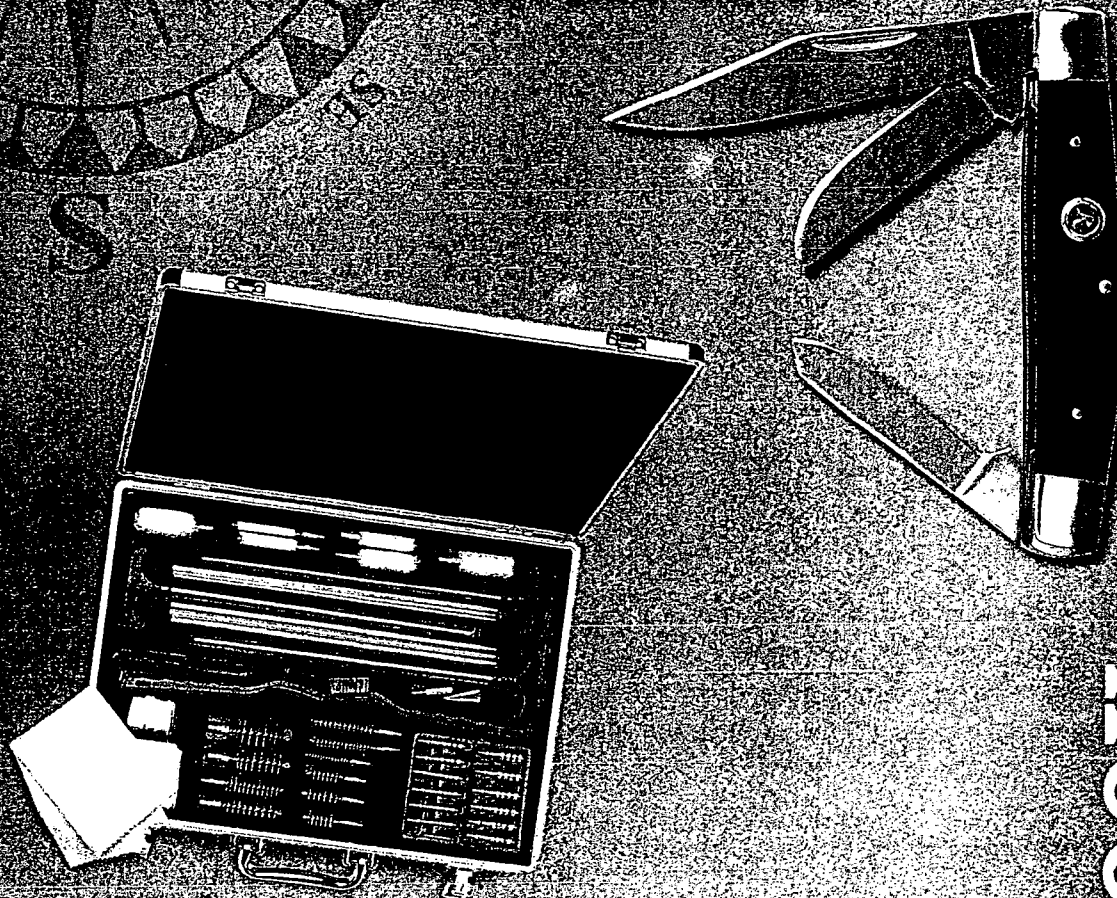

Offerings for 2006 are as follows:

Nitro Turkey™ Magnum Loads - Buffered

	Gauge	Shell Length	Payload	Velocity	Shot Size

REMINGTON CONTINUES ITS COLLECTIBLE KNIFE SERIES FOR 2006

Madison, NC – For generations, sportsmen and knife collectors have eagerly anticipated the annual arrival of Remington® collectible knives. For 2006, Remington is continuing the tradition by offering two finely crafted, limited edition knives.

2006 Bullet™ Knife – Continuing a tradition that spans for decades, Remington is proud to offer the 2006 Bullet Knife entitled “**Trail Boss**”. This handsome folder is designed in the single hinge banana-jack pattern and features a 3-inch Drop Point blade and 4 1/4-inch Spey blade. The beautiful black cherry jig-bone handle exhibits nickel silver bolsters and rivets with solid brass liners and traditional Remington bullet shield on the face side. The 2006 “Trail Boss” Remington Bullet knife has an overall length of 5 1/4-inches closed.

Outdoor Exploration Knife – The second in a series of highly collectible, one-year production, knives celebrating the exploration of the great American wilderness. The East knife features both the Remington logo and traditional “Remington Country” compass face with the corresponding direction etched on the clip blade. In addition to the unique blade work, the “compass” shield, signifying the outdoor exploration series, is embedded on the genuine jig-bone handle. The handle is accented with nickel silver bolsters and rivets with solid brass liners. The East knife is constructed with a 3 1/8-inch Clip blade and 3-inch Spey blade with a closed length of 4 1/2-inches.

The Outdoor Exploration Knives are packaged in a unique display box designed in a manner that progressively builds a Remington Country Image on two sides upon completion of the set.

All Remington collectible knives are made in the U.S.A. and are available at your local Remington dealer or please visit our web site at www.remington.com.

ADDITIONS TO THE REMINGTON® SPORTSMAN™ LINE INCLUDE TWO NEW FOLDERS AND HANDY CAMP SAW

Madison, NC – Highly functional and constructed of durable materials, the Sportsman Series line of knives and utility tools provide a full range of heavy-duty, cutlery products for use in the field or on the job. Joining this series are the **Black Delrin® Pocket Folders** in 12 popular offerings; the easy-handling **F.A.S.T.™ (Fast Action Soft Touch) Folders** in 3 versions with choice of black or stainless blades; and a compact **Folding Camp Saw**.

Sportsman Series Black Delrin Pocket Folders – Featuring black Delrin stag handles and satin-finished 440 stainless steel blades, these traditionally-styled, pocket folding knives are available in 12 classic designs. Each has brass liners and satin finished stainless steel pins and bolsters. These handsome folders are adorned with a silver circle shield with “R” logo on the face handle and etched Remington Sportsman Series logo on the primary blade. For a complete listing of the knife designs, blade offerings and overall closed lengths please refer to the chart below.

Sportsman Series F.A.S.T. Folders – Conveniently designed for quick one-hand opening, these functional knives feature a 3 5/8-inch clip point blade with serrated lower edge constructed of 440 stainless steel and easy-grip, rubber-coated stainless steel handle for those demanding jobs in the field. The innovative thumb collar provides for quick, one-handed opening of the blade. The rubber-coated handle has a soft feel, but provides excellent grip and control when working in less than ideal conditions. When opened, the F.A.S.T. knife has an overall length of 8 5/8-inches and a closed length of 5-inches. Available in three versions – **Mossy Oak® Obsession® Camo Handle with Stainless Blade or Black Blade**; **Advantage® MAX 4-HD® Camo Handle with Stainless or Black Blade**; and **Matte Black Handle with Stainless or Black Blade**. Each folder features a convenient pocket clip that matches the blade finish. Once you use them, these “Fast Action Soft Touch” knives will never leave your hands.

Sportsman Series Folding Camp Saw – The perfect tool for your backpack, this versatile folding camp saw is constructed of an 18 3/4-inch high carbon steel blade; silver anodized, extruded aluminum frame; and impact-resistant, black ABS handle. The easy fold-up design provides for ease of assembly with quick release button or disassembly in a matter of seconds to a convenient 22 1/2-inch closed length. Weighing in at just less than 18 ounces, this handy saw is a great carry tool that delivers in performance with its rugged construction.

For value, quality and functionality, see the complete line of Remington Sportsman Series knives and utility tools at your local dealer or visit our web site at www.remington.com.

REMINGTON INTRODUCES TARGETMASTER™ DELUXE AND SPORTSMAN™ CLEANING KITS - EVERYTHING THE SERIOUS SHOOTER NEEDS FOR PROPER GUN MAINTENANCE

Madison, NC – Serious shooters expect precision from their equipment. Their firearms must perform flawlessly and to do so – they have to be clean. The new Remington® Targetmaster Deluxe and Sportsman cleaning kits provide all the necessary cleaning tools in one easy to use system.

The **Remington Targetmaster Deluxe** cleaning kit has more to offer the serious shooter than standard cleaning kits. The 52-piece deluxe kit contains the following components for the proper maintenance of most rifles, shotguns and handguns:

- Silicone gun cloth
- 3 sets of 3-piece brass cleaning rod with swiveling handles
- Precision brass patch jags fit .17-.50 calibers
- Complete assortment of bronze bore brushes for all standard gauges and calibers (.17-.50 calibers, .410-12 ga)
- Complete assortment of cotton bore swabs for all standard gauges and calibers (.17-.50 calibers, .410-12 ga)
- 100 universal cotton patches
- Brass and nylon brushes
- Packaged in a sturdy aluminum case with positive latches

The **Remington Sportsman** cleaning kit is the perfect high-quality choice for the hunter or shooter that doesn't need to maintain a large variety of firearms. Ideal for the home or lodge, this 27-piece cleaning kit contains the following components:

- 3-piece brass cleaning rod with swiveling handles
- An assortment of the most popular brushes, mops and patch sizes
- Brass and nylon brushes
- Attractive, dark stained wooden storage box with positive latches

REMINGTON EXPANDS ITS POPULAR LINE OF GUN CARE PRODUCTS FOR 2006

Madison, NC – Remington is well known for its wide variety of premium gun care products. Regardless of your shooting discipline, Remington has the product for protecting and cleaning your most valued possessions. New for 2006, Remington unveils two innovative cleaning chemicals specifically developed for shotgun and rifle shooters.

40-X™ Bore Cleaner - Holding true to its namesake, Remington® 40-X Bore Cleaner was developed to provide the shooter with a cleaning product that improves accuracy and performance. The non-acidic, non-corrosive formula was formulated specifically to remove carbon, lead, copper fouling and plastic wad residue from firearm bores with minimal effort. Remington 40-X Bore Cleaner is available in 2 oz. liquid squeeze bottles.

Shotgun Cleaner - This new CFC-free solvent and cleaner will take the guesswork out of cleaning shotguns. Remington Shotgun Cleaner is specifically intended to be used on all interior surfaces of your shotgun for fast and easy cleaning. Remington Shotgun Cleaner is effective in removing copper, lead and plastic deposits from barrels and choke tubes as well as carbon and powder residues from actions, firing pin assemblies and trigger groups. Remington Shotgun Cleaner is available in 18 oz. spray cans.

Also new for 2006, Remington's well-known Rem® Oil and BriteBore® products have been repackaged in larger 2 oz. squeeze bottle configurations.

Proper care of your firearms is essential to safe and accurate shooting. Remington's gun cleaning products are easy to use and provide you with effective protection of your firearms. Look in the gun cleaning section at your local dealer for these new items from Remington.

Remington
2006 PRESS RELEASE
FEBRUARY 8, 2006

FOR IMMEDIATE RELEASE

Contact: Linda Powell
Eddie Stevenson
(800) 537-2278 (Press only)

REMINGTON ANNOUNCES: **WINGMASTER^{HD}**
A TECHNOLOGICAL BREAKTHROUGH FROM THE UNDISPUTED LEADER IN
HIGH PERFORMANCE NON-TOXIC SHOTSHELL AMMUNITION

Madison, NC – From the company that created the performance standard for ultra high density, non toxic shotshells with the Premier® Hevi-Shot® brand, comes a revolutionary new product that raises the performance standard yet again. Remington is proud to announce **Wingmaster HD**, the ultimate in high-performance hunting ammunition, will be available for the 2006 waterfowl season.

Remington's industry-leading R&D team, in partnership with world-renowned metallurgists has developed a technological breakthrough in material composition and pellet forming processes. Utilizing Remington's proprietary composite of tungsten-bronze-iron metal (approved for waterfowl hunting by the U.S. Fish and Wildlife Service), Wingmaster HD outperforms existing products with distinct and measurable advantages in pattern density and overall multi-range effectiveness.

With "Drop-Dead Better" Performance - Wingmaster HD exhibits the following advantages:

12.0 Grams/CC Pellet Density

The optimal pellet density for an ideal combination of pattern energy and dispersion without sacrificing pellet count at extended ranges – unlike some competitive loads.

Round, Smooth, True-to-Size Pellets

Wingmaster HD pellets are smooth and round, resulting in true flight for dense, efficient patterns with no flyers. Every pellet is consistent in size and shape and equally effective in performance.

Choke Responsiveness

Changing hunting conditions often call for an adjustment in pattern diameter. Wingmaster HD has a hardness rating similar to steel shot resulting in improved choke tube responsiveness – a benefit not previously obtainable with high density shot materials.

Equal Energy in Every Pellet

Because Wingmaster HD pellets are true-to-size and round, individual pellets maintain consistent velocity and energy for deep penetration at long range – better than competitive products of comparable density.

REMINGTON ANNOUNCES: **WINGMASTER^{HD}**
**A TECHNOLOGICAL BREAKTHROUGH FROM THE UNDISPUTED LEADER IN
HIGH PERFORMANCE NON-TOXIC SHOTSHELL AMMUNITION (CONT'D)**

In recent years, non-toxic shotshell ammunition technology has advanced dramatically, forever changing the sport of waterfowl hunting. Remington Premier Hevi-Shot gave hunters the capability to effectively harvest birds with a degree of lethality never before attainable. Remington's commitment to continuous improvement and evolving technological advancements has led to the development of Wingmaster HD, once again, setting the standard for the next generation of non-toxic shotshell ammunition with "Drop-Dead Better" performance.

###

HEVI-SHOT® is a registered trademark of ENVIRON-Metal, Inc.

**REMINGTON WELCOMES THE MOST INNOVATIVE, MOST EXCITING,
SHOTGUN EVER TO ITS FAMILY OF AUTOLOADERS - THE MODEL 105 CTi™**

Madison, NC – Highly anticipated, Remington is pleased to announce the most exciting addition to its respected, 100-year lineage of reliable autoloading shotguns – the 12-gauge, 3-inch magnum **Remington® Model 105 CTi** shotgun. This technologically-advanced, gas-operating autoloader combines great looks, smooth handling and reliable operation in our lightest weight (7 lbs.) and softest recoiling, autoloading platform ever. Just what you have come to expect from Remington – innovation, performance and dependability.

The Model 105 CTi autoloading shotgun has many patent-pending and unique design features beginning with the core of the Model 105 – its skeletonized 12-gauge receiver, fully capable of handling 3-inch magnum or light 2 3/4-inch loads interchangeably. Constructed of aircraft-grade Titanium with a carbon-fiber shell, the receiver provides unparalleled strength in a slim, compact design which reduces the overall weight of the gun. The ambidextrous “Double Down” bottom feed and ejection system provides for quick, smooth reloading and no distractions from shell ejection. The TurboFeed™ loading system allows for the first shell to be loaded directly from the magazine into the chamber; provides rapid loading; faster follow-up shots; and equally as fast unloading.

The Model 105 CTi autoloader reduces the shock of felt recoil through an innovative, four part process with up to a 50% reduction in recoil. The Rate Reduction System, located in the stock, provides for consistent and reliable feed, regulation of bolt velocity and reduction of felt recoil through its patented oil-filled cylinder. Addition of a newly designed, convex R3® Recoil Pad further reduces recoil and provides for ease of mounting the Model 105 CTi on the range or in the field over bulky outer clothing. A simple and efficiently-designed gas operating system features a one-piece, inertia sleeve and gas seal. In addition to reducing recoil, this design reduces maintenance of the Model 105 CTi by requiring less cleaning with fewer parts. Further reduction of recoil is achieved through the overbored barrel (.735 inch diameter) with lengthened forcing cones. Overboring also reduces pellet deformity and increases pattern performance.

Durability and performance features on the Model 105 CTi have not been overlooked. The hammer-forged, carbon steel barrels come with twin bead sights and are available in 28 and 26-inch lengths. Unique to the Model 105 is a stylized vent rib crafted of carbon and aramid fibers, which further reduces weight and provides increased strength and protection against damage. The overbored barrels are equipped with the high-performance ProBore™ Choke Tubes to optimize patterns and each Model 105 comes with Improved Cylinder, Modified and Full flush choke tubes. Our patented, multilayer TriNyte™ coating protects the receiver from scratches and corrosion and adds to the gun's durability. The unique rotating bolt lock-up reduces friction and increases the smooth and efficient operation of this autoloader. A critical feature of any high performance shotgun is the trigger and the Model 105 CTi features a new patent pending trigger designed for crisp, consistent trigger pulls (set at 3 1/2 to 4 pounds from the factory) and has a traditional cross-bolt safety, which is reversible for left-handed shooters.

REMINGTON LAUNCHES THE NEXT GENERATION OF MODEL 1100™ AUTOLOADERS - THE MODEL 1100 G3 WITH 2 3/4 AND 3-INCH CAPABILITY

Madison, NC – The Remington® Model 1100 autoloading shotgun has earned a solid reputation worldwide on the range and in the field for over four decades and continues today to be the most popular autoloader in the marketplace. Now future generations can count on the same reliability, smooth handling and soft recoil of the Model 1100 in a new, enhanced 2 3/4 and 3-inch version – the **Model 1100 G3** in 12 and 20-gauge offerings, delivered in a lockable, hard case.

The performance-driven design of the G3 autoloader makes it capable of handling 2 3/4 and 3-inch shells and incorporates features that enhance the gas-operating system, reduce wear and improve cleaning of the time-proven Model 1100. Starting with the solid carbon steel receiver, the G3 wears a Titanium PVD (Physical Vapor Deposition) coating which provides an attractive, yet durable finish. All internal operating parts (action bars, action bar sleeve, action spring, locking block, hammer, sear and magazine tube) are honed and feature a nickel-plated, Teflon® coating as do the trigger and extended carrier release. Other improvements include a pressure compensated barrel which enables the use of light 2 3/4-inch target loads interchangeably with heavier 3-inch magnum loads and the recoil-dampening R3® Recoil Pad, which significantly lessens felt recoil for quicker target acquisition and follow-up shots.

The 12-gauge versions of the G3 have overbored (diameter of .735 inch) vent rib barrels which utilize the new custom-designed ProBore™ choke tubes. Choice of a 28 or 26-inch barrel length is available with Skeet, Improved Cylinder, Light Modified, Modified and Full ProBore flush choke tubes. The 20-gauge versions feature the versatile Rem® Choke system on the carbon steel vent rib barrel and include Improved Cylinder, Light Modified, Modified, Improved Modified and Full choke tubes with choice of barrel in 28 or 26-inch lengths.

Beyond enhancing the performance, the Model 1100 G3 wears the look of modern elegance with the all new Realwood™ Semi-Fancy carbon fiber laminate stock featuring high gloss finish and stylized machine cut checkering; chrome-finished operating handle; script "R" logo on the grip cap in a contrasting Titanium finish; and the receiver is handsomely embellished with stylized engraving. Completing the G3 package is a high grade travel case (\$149 retail value).

It may be time to retire your treasured Remington Model 1100 and upgrade to the next generation – the **Model 1100 G3** autoloading shotgun available at a suggested retail price of \$1065. See your local Remington dealer or visit our web site at www.remington.com for specifications on the complete line of Model 1100 shotguns.

(800) 537-2278 (Press only)**REMINGTON ENTERS PREMIUM OVER & UNDER SHOTGUN MARKET
WITH THE PREMIER® LINE - AVAILABLE IN 12, 20 AND 28 GAUGE**

Madison, NC – The new Premier Over & Under shotgun family combines the dependability and reliability that you have come to expect from Remington with fine Italian craftsmanship, balance and smooth handling. These solidly-built break actions will be available in three versions for 2006 – a 12-gauge **Premier STS® Competition** designed for the clay shooter and the **Premier Field** and **Premier Upland Grades** in 12, 20 and 28-gauges, ideal for the serious bird and small game hunter. Each gun features a low-profile, machined steel receiver; polished blued barrels; premium walnut stock and traditional Schnabeled fore-end, both with detailed cut checkering. The Premier Over & Under shotguns come with a protective hard case.

Premier STS Competition – This 12-gauge version is available with a 28 or 30-inch target-style barrel featuring a wide 10mm rib and ivory front and steel mid beads. Vented barrel filets aid in dissipation of the heat associated with high-volume shooting. The walnut stock with right-hand palm swell and modified Schnabel fore-end feature a handsome gloss finish. The overbored barrels (0.735 inch diameter) come equipped with five custom ProBore™ Extended Choke tubes (Skeet, Improved Cylinder, Light Modified, Modified and Full) for optimum patterns. The barrel selector is conveniently located on the tang safety. Other features that set this 12-gauge apart from the competition include stylish engraving; protective Titanium PVD (Physical Vapor Disposition) coating on the receiver; script "R" logo on the bottom of the receiver; and distinctive gold trigger. Suggested retail price: \$2400

Premier Field Grade – Available in 12, 20 and 28-gauge with choice of 26 or 28-inch barrels. These field versions feature a traditional vent barrel with 7mm rib, ivory front and steel mid beads as well as solid barrel filets, making this over & under right at home in any field setting. The high-quality walnut stock and hunting Schnabel fore-end feature a satin finish. Adding to the appeal of this attractive field gun is the nickel-finished receiver with game scene engraving. All versions feature flush ProBore Choke Tubes. Suggested retail price: \$1971

Premier Upland Grade – The upland version boasts the same features and gauge availability as the Field Grade. With classic enhancements, such as oil-finished wood stock and fore-end and complimenting case-colored receiver, accented with gold game scene engraving, the Premier Upland will be the envy of every bird hunter. Suggested retail price: \$2057

MAUSER ACTION RIFLES NOW IN REMINGTON COUNTRY - REMINGTON PROUDLY INTRODUCES THE MODEL 798™ CENTERFIRE RIFLE - BASED ON THE 98 MAUSER ACTION AND THE COMPACT MODEL 799™ MINI MAUSER CENTERFIRE RIFLE

Madison, NC – A survivor of two world wars and over one hundred years of service, the widely popular, classic Model 98 Mauser action has served faithfully as the platform of choice for many successful bolt action rifles and is sought after by today's hunters and shooters. Now Remington is pleased to announce a line of bolt action centerfire rifles based on the Mauser 98 action – the **Model 798** in four popular standard cartridge chamberings (.243 Win, 308 Win, .30-06 Sprg, and .270 Win) and four magnum chamberings (7mm Rem Mag, .300 Win Mag, .375 H&H, and .458 Win Mag).

The Model 798, with its square bridge receiver is true to the Model 98 Mauser lineage in every way. Standard features include two dual opposed forward locking lugs, rear safety lug, flat bolt face, non-rotating claw extractor for legendary controlled round feeding and fixed blade ejector. Additional features include a solid steel trigger guard with integral magazine well, steel hinged floor plate, steel magazine follower and a single stage trigger with a two-position sporter style tang safety. Hammer forged barrels deliver outstanding accuracy from the bench or in the field. Receivers are drilled and tapped for scope mounts and feature a rich, high-polished blued finish as do the barrels.

These high-performance bolt action rifles combine the inherent Mauser action accuracy and reliable, controlled round cartridge feed in an aesthetically-pleasing, brown laminate stock designed exclusively for the Model 798 with the American shooter in mind. In addition to classic American lines, the stock features a one inch rubber recoil pad, sling swivel studs and distinctive cut checkering.

A modern variant of a timeless classic, the **Model 799** Mini-Mauser is available in five traditional short action chamberings (.22 Hornet, .222 Remington, .22-250 Remington, .223 Remington and 7.62x39mm). The Model 799 features many of the same characteristics of the Model 798 including solid steel receivers and trigger guards as well as a single stage trigger with two position safety. The Model 799 forgoes the heavy non-rotating claw extractor for a Sako-style extractor well suited for feeding and extracting smaller cartridges.

Like the Model 798, the Model 799 features a clean, hammer forged barrel for exceptional accuracy. Both the barrel and solid steel receiver have a polished blue finish and are drilled and tapped for scope mounts. Rounding out the list of features are a handsome brown laminated stock with sling swivel studs, butt plate and hinged floor plate magazines (.22 Hornet has a five-round detachable magazine box).

REMINGTON PROUDLY INTRODUCES THE MODEL 798™ CENTERFIRE RIFLE -
BASED ON THE 98 MAUSER ACTION AND THE COMPACT MODEL 799™ MINI
MAUSER CENTERFIRE RIFLE (CONT'D)**

Known for positive cartridge feed and ejection with claw-style extractor; strength and reliability; fast lock time and accuracy, the classic Mauser 98 action platform is the core of the new Remington® Model 798 and the foundation for the new Model 799. Combining these attributes with a handsome, wood laminate stock and Remington's assurance of quality a Model 798 and Model 799 should be in every shooter's gun safe. Available at a suggested retail price of \$599 (standard cartridge offerings), \$635 (7mm Rem Mag and .300 Win Mag) and \$839 (.375 H&H and .458 Win Mag).

REMINGTON INTRODUCES AN AFFORDABLE, FULL FEATURED BOLT ACTION RIMFIRE RIFLE - THE MODEL FIVE™

Madison, NC – Remington continues to expand its line of versatile rimfire rifles with the introduction of the **Model Five Bolt Action**. This fully featured, yet affordable, bolt action delivers European-quality performance and is available in .22LR and .22WMR. The Model Five joins an impressive line-up of rimfires that includes the new single shot Model 412™ bolt action, the family of dependable Model 597™ autoloaders and a classic selection of finely crafted production and Custom Shop bolt actions.

Every shooter needs a bolt action rimfire rifle and the value-packed Model Five with detachable magazine is a solid choice for the small game hunter, plinker or new shooter. Housed in a sturdy, weather resistant brown laminate stock, the Model Five has a reliable and smooth-operating bolt action which delivers accuracy and performance with its five-round capacity, detachable steel magazine clip. The 22-inch carbon steel, hammer forged barrel (with 1:16 inch rate of twist) and solid grooved receiver feature a polished blue finish and provide added versatility with the option of using the adjustable, big game-style rifle sights or addition of a scope. Additional features include steel trigger guard, manual safety, sling swivel studs and butt plate.

For performance and sheer enjoyment, add an affordable Remington **Model Five** rimfire rifle in .22 LR or .22WMR to your gun collection today. Available at a suggested retail price of \$356 (.22LR) and \$370 (.22WMR).

REMINGTON INTRODUCES ENTRY-LEVEL SINGLE SHOT RIMFIRE - THE MODEL 412 YOUTH BOLT ACTION RIFLE

Madison, NC - For 2006, joining the Remington® line-up is the value-priced **Model 412 Youth Bolt Action Rimfire** in .22 LR, a sturdy multi-purpose single shot designed with new shooters and plinkers in mind. Remington offers an extensive array of rimfire rifles from the classic, high grade Model 504™ bolt action to the value-packed family of Model 597™ autoloaders.

Most young hunters or shooters began their rifle-shooting experience with a single shot, bolt action rimfire for its simplicity of operation, safety features and the affordability of both rifles and ammunition. This solidly-built bolt action is a single shot with innovative second shot holder. Once the bolt is open, the awaiting .22 cartridge will drop into the chamber. This unique design provides for the safety of a single shot rifle with the convenience of an available second round. Closing of the bolt cocks the rifle and once the rifle is fired, the safety button is pushed rearward as the bolt is cycled and secured into the "safe" position. This automatic safety feature and non-adjustable trigger add to the reliability and safety of the Model 412. The carbon steel barreled action has a polished blue finish and is housed in a durable hardwood stock with convenient sling swivel studs. The barrel features adjustable open sights and the receiver is grooved to accept dovetail rimfire-style scope rings.

Sharing the traditions of the outdoors with the next generation is the responsibility of every hunter and shooter. The Remington Model 412 Youth Bolt Action Rimfire is the perfect tool to get them started. These affordable rimfires are also ideal for youth groups or camps, scouting or NRA training courses. Available at a suggested retail price of \$139.
