

Bolt Action Centerfire – Bolt Lock Safety Modification Program
Website text

Remington Model 30 and 30 Express bolt-action rifles are not included in the safety modification program. These rifles were manufactured from 1921 until 1940. However, these old firearms do have a bolt-lock mechanism, which requires the safety to be placed in the "F" or "Off or Fire" position to unload and load the rifle. As with any firearm, special care must be taken during the loading and unloading process. Always keep the muzzle pointed in a safe direction. Keep the safety in the "S" or "On Safe " position at all times until you are ready to shoot. Always unload your rifle when not actually in use. Every firearm should be unloaded as soon as you are finished shooting – before taking it into your car, camp or house. Remington wants you to enjoy the shooting sports - safely!

Should you desire service on any of your Remington firearms please feel free to call us on our toll free service line (800) 243.9700 or visit the Remington authorized repair center nearest you. [insert link].

TRIGGER ASSEMBLY CHECKLIST

Gunsmith Name: _____

Customer's Name: _____

Model: _____ Serial #: _____

Date: _____

Firing Mechanism Examination Process

Question	Yes	No
1. Is there any rust on any of the trigger assembly parts?		
2. Is there any dirt or grime on any of the parts within the trigger assembly?		
3. Does there appear to be any sticky substances (grease, oil etc.) on any of the trigger assembly parts that could inhibit its functioning?		
4. Do any parts appear to be worn in a way that could cause the gun not to function properly?		
5. Do any parts appear to be damaged or broken?		
6. Have the adjustment screw settings been altered in any way (has the seal been broken)?		
7. Have any of the seals on any of the other Trigger plate assembly screws been broken, tampered with?		
8. Does it have any non-Remington Components?		
9. Was the firearm received with a specific safety related concern? If so, the rifle, MUST BE RETURNED TO THE FACTORY FOR SERVICE.		

If you answered yes to questions 1 – 8, then install a new Trigger Assembly on the rifle.

If you answered yes to question 9, then the rifle, **MUST BE RETURNED TO THE FACTORY FOR SERVICE.**

Remington Arms Co., Inc.
Subject: Bolt Action Centerfire Safety Modification Program

Notice of Change in Operation: Non-Bolt Lock Centerfire Firearms:

Due to the changes made to your Remington firearm, it will no longer be necessary for you to put the safety in the "F" or "Fire" position to load and unload the rifle. Your rifle can be loaded and unloaded while the safety is kept in the "S" or "Safe" position.

However, you must still follow the 10 Commandments of Firearms Safety in handling your firearm. Always keep the muzzle of any firearm pointed in a safe direction, especially when you are loading or unloading. Keep the safety in the "S" or "Safe" position at all times until you are actually ready to shoot. Always unload your firearm when not in use. Always unload your firearm as soon as you have finished shooting before taking it into your car, camp or home. Verification of Decline of Repair Form

Date: _____

Dear _____

We have received the following firearm: _____
Serial number: _____.

We have examined the firearm and determined that the Fire Control Mechanism (Trigger Assembly) is in need of repair or replacement. In its current condition, the rifle cannot be operated in a safe or reliable fashion, and the rifle should not be used unless and until the trigger assembly has been appropriately repaired or replaced. As such, we recommend to you via repair #: _____ a recommended course of repair or replacement. The total dollar cost of your repair was quoted to you was \$ _____.

You have elected not to have Remington perform the recommend repairs, but instead have directed Remington to return the rifle to you in its current condition. We will return the firearm once you have signed and returned this document verifying that:

- You understand that the firearm is currently not in a safe or reliable condition.
- You were presented with an opportunity to have the firearm repaired or restored to a safe operating condition.
- You have been advised that the firearms should not be used until the trigger assembly is properly repaired or replaced by a Remington Authorized Repair Center or by Remington Arms Company, Inc.
- You have instructed Remington Arms Company, Inc to return the firearm to you in its present condition.

FIREARMS CARE AND CLEANING – BOLT ACTION RIFLES

To Clean your bolt-action rifle, Remington suggests you follow these steps

1. Point the firearm in a safe direction
2. Place the safety in the 'S' or "safe" position.
3. Pull the bolt to the rear. Check the chamber to make sure it is empty and not loaded. Never try to clean a loaded gun.
4. Open the magazine, or remove if possible. **Make sure the magazine is empty.**
5. Release the bolt stop and remove the bolt. **Refer to the instruction manual.**
6. If the firearm has a scope, cap both ends to protect the optics. Never spray cleaners or lubes on a scope.
7. Clean the bore following instructions in your **instruction manual**. We recommend that you use a plastic bolt guide to protect the trigger assembly during the bore cleaning process.
8. Scrub the breech with nylon breech brush moistened with a few drops of Rem Oil. For heavy fouling, use a bronze or stainless steel breech brush.
9. Clean the receiver and barrel exterior using patches moistened with Rem Oil.
10. Spray the bolt with Rem Action Cleaner, then scrub with a nylon breech brush, especially the face, locking lugs, and extractor. Finish with a light spray of Rem Oil.
11. After heavy or extended rifle use, remove the stock according to the manufacturer's manual, then spray the trigger assembly, the action, and receiver with a moderate amount of Rem Action cleaner. Brush off dirt and caked lubricants. Wipe clean with patches. Spray lightly with Rem Oil.
12. Reassemble the gun carefully and wipe all metal surface with Rem Oil. Wipe to remove fingerprints and leave a light oil film for rust prevention.

Caution: If you have any questions about the safe operating condition of any firearm, take it to a qualified gunsmith or send it to the manufacturer for service and evaluation.

Please visit www.remington.com for additional firearms care and safety tips including our interactive guide to shooting and hunting safety and our guide to buying a used gun.
