Bridgeport, Connecticut, September 16, 1941

TO: E. J. LONE
 ELION

FROM: E. A. BROWN

SUBJECT: M/720A - Production Sample - P-31 Serial No. 40035
 M/720A - Model Gun - P-30 Serial No. M1

Confirming our telephone conversation, we are returning these guns to you via Trigg Stewart. He should arrive in Elion at 9:17 in the afternoon.

We direct your attention to the following points:

Back - Grip looks heavier than the model.

At the fore-end it is deeper and wider than the model.

Trigger - There is too much creep in the trigger.

Distance from trigger to the point of grip is 1/8" longer than the model. The adjustment of trigger pull may also correct this distance.

Front Sight - The shape front of blade is not like model.

Rear Sight - Flat top open rear sight was approved on the model gun. We understand you want approval to use semi-buckhorn sights until your supply (2,200) is consumed in order to have approximately \$970 inventory obsolescence.
