Bridgeport, Connecticut  
December 20, 1945

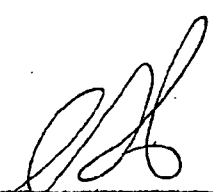

TO: R. A. A. HENTSCHEL  
FROM: G. S. CUMMINGS  
SUBJECT: MASS BARREL ACCURACY OF CALIBER .257 REM. ROBERTS  
LOT B17217

As reported to you in our telephone conversation of December 17, 1945, we have completed the accuracy firing of the subject cartridge as requested in your letter of December 5.

A copy of the detailed test results is attached.

As explained to you, it was necessary to do the target measuring at Bridgeport because of difficulties with the target machine, however, this extra work has not been charged to your Plant Order. Targeting was done strictly in accordance with Accuracy Test No. 4 of the Gun Testing Manual.

The unused rounds and empty cases are being returned to you.

  
G. S. Cummings, Supervisor
