FROM: R. E. Green
SUBJECT: 4/24 - 722 PLOTT LINE SYSTEM

[illegible]

The test program is being conducted under conditions which require a total of 10,000 rounds of ammunition anticipated for M728 and T28. The shooting will include all types of bullet contemplated for manufacture in accordance with each type of the particular caliber. A single round of ammunition will be selected for an endurance test consisting of 100 rounds of firing. Another factor which, in all probability, will reduce the use of the testing in lack of ability of our part to acquire sufficient ammunition.

E. J. Kistner

June 28th, 1946

The above picture is being presented to you so that you may be in a position to determine what can be done towards procuring a larger sum of money for this testing.
