PRODUCT  
ENGINEERING

A McGraw-Hill Publication - 330 West 42nd Street,  
New York 18, N. Y.

May 27, 1948

Mr. M. D. S. Reynolds  
Manager, Public Relations Section  
Remington Arms Co.  
Bridgeport, Conn.

Dear Mr. Reynolds:

I enjoyed talking to you over the phone and hope that we may be able to get together on a story from your company for publication in Product Engineering. I know that men in your engineering department are well acquainted with the magazine and know which of your projects might have editorial possibilities for the magazine.

We are mighty interested in basic engineering and design data and information on materials, finishes, designing for certain processes, methods of analysis, etc., to be written for mechanical engineers and designers.

As we agreed, such an article would probably not have any direct advertising value but would have prestige value. However, from our standpoint, I know that you maintain high standards of design and engineering, and for this reason would appreciate editorial material from your company.

Very truly yours,

/s/ ERNEST W. SCHLIEBEN  
Associate Editor
