Mr. Henry P. Davis
Public Relations Division
Remington Arms Company
Bridgeport, 2, Connecticut

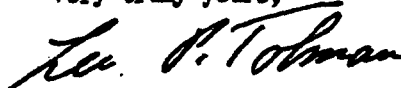

Dear Mr. Davis:

Mr. Schlieben upon leaving our organization has given me your letter on the model 721 rifle. This looks like a very interesting item for our Product Design section, since the engineering design of a firearm has seldom been described before.

Would it be possible to arrange for photographs and drawings with the necessary technical notes to describe the unusual engineering points of the gun, and the headaches encountered in developing it.

Any material we prepare will be submitted for your approval before publication.

Very truly yours,

LT:em

Lee P. Tolman
