MODEL 725 DEVELOPMENT

Confirming telephone conversation of this date, we advised that first model for this rifle is ready for review with Sales, and it is understood that this can be accomplished in connection with a meeting at Ilion within the next week along with review of several other items which were discussed at the last Operations Committee Meeting.

Incidentally, the present definitive model is equipped with a stock which is not checkered since believe you wish to consider its use interchangeably with the M/721-722. Checkering, of course, can be added for the M/725 as desired.

It is of course important that we freeze this design at earliest possible date in order that there be a chance of meeting proposed schedule for introduction,
