

Bridgeport, Conn.
October 12, 1956

TO: G. M. Calhoun
Director of Research

FROM: J. H. Miller

SUBJECT: Model 400 - Design - Fire Control Mechanism
Capt. Benjamin Haiman

We are attaching the complete file covering the above subject, incorporating S. M. Alvis' letter of October 2nd and John H. Lewis' letter of October 8th.

You will note that this originally pertains to a complaint from a customer in Israel transmitted to us by our distributors, the firm of Zinik & Co. Ltd., Haifa, Israel.

This has led into a technical subject which we believe falls under the "Remington Procedure for Handling Outside Suggestions" which would be best replied to through your office.
