

III. APPENDIX

EXHIBITS A*, B* AND C* (IMPROVEMENT SUGGESTIONS)

As a result of meetings held during February and March of 1958 a large number of ideas and suggestions were received covering a wide range of subjects for improving customer appeal, improvements in quality, further simplification of components or processes, and for lower cost and ways of building on the present line to extend its life and earnings with the least expense.

The contributing groups were: Production, Product Engineering and Control, Methods & Standards, Research & Development, Planning, Accounting and Bridgeport Sales.

These suggestions have been classified into three lists for responsibility in evaluating and follow-up:

- A - Production, PE&C, and M&S
- B - Sales and Management
- C - Research & Development

The first list, Exhibit A, has already been reviewed by the plant and is being incorporated into the plant improvement program wherever feasible.

The second list, Exhibit B, has not been reviewed or any attempt made to exclude the items of questionable merit. Additional details of explanation will be required on some of the suggestions submitted when reviewed by the responsible groups as the next phase of the program.

The third list, Exhibit E, has been partially reviewed by the Ilion Research Manager but no attempts have been made to exclude the items of questionable merit. Again, further explanation on some of the suggestions submitted will be required during review of this list before a program can be established.

*Appendix material not included may be obtained by request.
