MODEL 700 - SERIAL NUMBERS

Although no one has asked yet, am sure that information will be needed if, when and as above model moves toward production. Believe the present range of serial numbers for the M/721-722 has reached the 400,000 series. Question now is shall we start over, or is it desired to pick up at 500,000 mark; or since this is a 700 Series, perhaps may want to start at 700,000 or some related figure. Plant would rather start at one thousand.

OK
