MODEL 700 BOLT ACTION CENTER FIRE RIFLE

Confirming our phone conversation, following are Sales Department comments on the sample Model 700 rifle recently sent to Bridgeport:

1. Cutaway of wood by the safety appears too large and might be a dirt catcher.
2. Safety has noticeable click when released.
3. 3-position safety would be preferable.
4. Suggest knurling on bottom as well as top of bolt handle.
5. 50% of people trying gun find stock is too straight.
6. Sample had tool marks on trigger guard.
