Attached is a copy of ~~Gail Evans~~' memo regarding steel barrels on the 243 and 244. I agree with his philosophy - but might well change on the 244 caliber, if and when we offer it in the 700. This might be a good plus feature to get us off the ground - if we announce such.

1/3/62 Pete says put stainless in 244
not in 243. Question on price?
