SPECIAL BARREL REMINGTON MODEL 700 RIFLE
CALIBER .243. PART NO. 2430

Gentlemen:

Your letter of December 25, 1961, requested shipment of a Remington Model 700 partially finished barrel in caliber .243 (our part No. 24301). Production of the Model 700 Rifle has been discontinued in favor of our new Model 700, and accordingly Model 700 Barrels will only be produced in the future as needed for parts stores. Our current parts stock will be adequate for quite some time, and, therefore, we have no information as to how long it will be before a new run might be scheduled.

In the partially finished condition in which you want this barrel, the only difference between a Model 700 and a Model 700 would be the length. The Model 700 Barrel is 2" shorter. We find that Model 700 Barrel was actually supplied on your previous order No. 0230. We hope that this substitution was satisfactory to you since it was the only way the order could have been filled. We would have preferred to have cleared with you in advance of the substitution, however had we been aware that no more Model 700 Barrels were scheduled.

- 2 -

Unless you advise us to the contrary, we will again plan to supply a Model 700 Barrel on your new order No. R03 0364. The Part No. will be No. 25285 and it will be withdrawn from our current production run for this item prior to rifling. It is to have smooth bore, be unchambered, unblued, and with no external cuts. Unit price will again be \$10.00 each Net F.O.B. our factory, Iliou, New York, with transportation charges prepaid and added as a separate item in our invoice.

Yours very truly,

R. B. Bowie
