MODEL 700 - PILOT LINE TEST - ACCURACY

Following is a report of results of accuracy tests which were run for five guns each in Calibers 222 and 30-06 on March 3, 1962.

Three 5-shot groups were fired in each gun using a 20X scope at 100 yds. bench rest. All groups were measured inside to inside.

Ammunition used in the 222 Caliber was Remington 50 gr. SP, Lot No. W03M. In the 30-06 Caliber, Remington 220 gr. SP Lot No. X053 ammunition was used. The 30-06 guns were then re-shot using Winchester 220 gr. Silvertip Exp. ammunition, Lot No. 61PH11, obtaining slightly better results.

Caliber 222 Rem. - 50 gr. SP, Code W03M Ammunition
