SUBJECT: SLING STRAPS FOR MODEL 700 ADL

F. E. Morgan

Dear Sam:

As we discussed on the telephone, we'd surely appreciate whatever you could do to help us with this situation.

At the time we printed the price list the question of sling straps was pretty far from anybody's mind. Therefore, we put the same sling straps in the catalog for the 700 ADL that were available for the Models 721 and 722, and 725. This was December, 1961.

Now we understand that while the 1" sling strap (actually 7/8") with quick release swivels is OK for the 700 ADL, the sling strap with regular swivel loops is not readily adaptable to the 700. Rather than refusing orders for rifles equipped with this sling strap we would greatly prefer to be able to supply this item on special order in accordance with the 150,000 price lists now distributed all over the world.

You can see what we're referring to in the enclosed copies from the catalog. Sure hope that you'll be able to help out in this matter, please.

If there is any further information you need, please give me a call and we'll try to work out a solution.

Thanks, George
