Mr. Homer Coss
120 Starr
Pontiac, Michigan

Dear Mr. Coss:

A 2-ounce trigger is available for the M/40X Center Fire. It can be installed by any competent gunsmith or you can return your rifle to the factory for its installation. The shipping time would be all the time lost as installation of the trigger takes less than one hour.

This trigger is supplied without a safety since safeties are not allowed to be used on the firing line and it is not recommended that the trigger be used in the field, at least to be carried in the cocked position. If you are referring to the standard trigger a new one can be fitted just as easily and very little time would be lost if you return it to the factory. Price of the 2-ounce trigger installed is \$52.95. A new standard trigger would be in the neighborhood of \$12.00.

If you desire to have this work done please attached a letter of explanation to the outside of the package telling us the number of your rifle and the trigger that you desire. Tag the rifle with your name and address to expedite service to you. Please make certain that the arm is unloaded before shipping.

Sincerely,

M. H. Walker, Chief Designer
