"You mail"

Dear Sirs,

Hats off to you idiots! I saw
a picture of your x P 100 pistol
- nothing wrong - except you guys
always make for the right hand,
- so why didn't you this time.

If you had placed the bolt on
the left side then a right
hander could have operated the
bolt with his left hand - but

most important - use your head -

as left handers would have had
a bolt action for target - varmint
& etc - brother - you goofed.

- Why do some people think
backwards

Sincerely yours
John Evans
