6 MM BARREL LENGTH

We are recommending that the Plant start the next lot of 6mm as 24" barrels.

Sales (Pete Morgan) has evidenced a desire to make all "Varmint Calibers" 24 inches. This, they explain, as purely a matter of popular demand. This would mean a change to 24" for the .243 Win.

A decision should be made at the next Operations Committee Meeting on whether or not we continue this lot of barrels as 24" and on subsequent production of both .243 and 6mm.
