DON'T SAY IT—WRITE IT 600

To Harold WatermanDATE Feb. 6, 1964FROM W. E. Leek *WEL*

The increased activity with regard to introduction of the 6mm in the Model 600 is of such magnitude that we will have to move into this area rather rapidly. I suggest that you start approximately 6 models on their way, with select barrels, so that we can get these tested and evaluated for accuracy.

Please see John Roberts for proper project numbers.
