Mr. W. J. Barber
Rt. 2, Box 96
Sarasota, Florida

Dear Mr. Barber:

I'm afraid that I'm confused; it's just that our letters keep crossing in the mail.

I have yours of September 1 and September 14 which further remind me that I am lazy since I haven't answered the first one yet.

The only problem with the Cutts compensator guns is that these are not regularly stocked items. If someone orders a gun with a Cutts compensator on it (for pay), we'll install the device. However, on consignment muskets, we can't do this.

Therefore, we are consigning you a Model 870 rifled sight special and sending you a 20 gauge full choke barrel along with it.

As far as the question of the wrinkled rib on your Model 500 and XP-100 is concerned, I am afraid I don't know the answer. However, I am forwarding a copy of your letter to our Elton, New York, plant with the request that they advise you on this.

Kindest regards,

E. S. McCawley, Jr.
Manager, Public Relations
