VICE PRESIDENT & ASST. GENERAL MANAGER

BARRELED ACTIONS

Sales recommends and requests approval for the trial sale of barreled actions for our bolt action center fire models. All sales would primarily be to gunsmiths and stock-makers well-qualified to complete special stocks for these barreled actions.

Our price would be \$5.00 less than the net distributor price of the complete gun. The operative return would be good, as can be seen by the attached sheet.

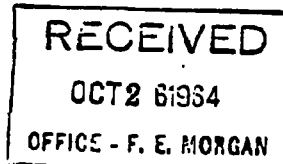

Ilion has agreed to supply these barreled actions and has stated that it will work no hardship.

At this time, Winchester, Savage, and various importers make these barreled actions available. We get many requests for these actions. Estimated volume would be 700 units yearly, this figure could double or triple, if we don't run into any difficult problems.

The offering, if approval is granted, will be made at our Gunsmith Conferences starting January, 1965.
