Dear Sirs,

JAN 15 1965

EXPORT

I wish to congratulate
you on your model 700 BDL
rifle. The appearance, finish, utility
and graceful Monte Carlo stock is
something to be proud of. As a
regular factory sports rifle this little
compact should win the hearts of
most hunters.

My custom De Luge, 700
BDL, in calibre 6 mm. with ample
supply of 100 grain ammo, recently
arrived and I am more than
thrilled with its lightness, feel.

and ease of handling, although I have as yet not fired a shot out of it I shall be sighting it in shortly, as I have fitted it with a new Weaver K4 scope.

During my almost 50 years of big game hunting I have owned many rifles, from many countries, including some of England's best and I feel that this model 700 in BDL with its 13 calibres should meet the needs of most sportsman.

If I may make one small criticism, it is the 20" barrel, I would like to see it with a 22" barrel, that of course is only my own personal opinion after many years of experience with barrels of around 24".

3

Should you reinstate the
publication of your excellent
little bulletin on International Shooting &
Hunting I would like to receive it
again.

yours faithfully
James W. Barnes
