Subject:	RE: M/710 T & P Issues
Importance:	High

Just a reminder that we have a conference call today at 4:00 pm Eastern time to review the latest test results. Topics for discussion will be:

- Schedule update
- Part breakages:
 - Bolt stop 1 failure 29 mb5 Bolt handle - 3 failures 1 during normal shooting 79 mb5 2 during abusive slam test - test stopped
 - Extractor sticking 1 gun
- SAAMI drop test on hold, can't adjust triggers to process minimum. Measured 5 gains "

The "worst" case sample for trigger position, side to side, was sent to Matt's attention Tuesday. Scopes have not yet been sent to Al Russo. Will go out either today or Monday.

One more topic to add to the list.

ISS System - could move ISS from "On" to "Off" with a screw driver (1 gun)

 Subject:
 M/710 T & P Issues

 Importance:
 High

The following topics will be discussed in detail during the 4:00 pm conference call today.

- Trigger Pull Toward high side of spec.
- Engagement High As measured by E-town, different methods (need to understand further)
- * Grip Caps Falling out during shooting
- Scope Issues -

- Fuzzy optics on some scopes
 Crosshairs rotated approx. 30 deg. on 1 scope
- * Box bottoms Falling off during shooting
- * Magazine followers Sticking in box (cause of stem low malfunction)
- Safety in Fire Position as received 1 of 30
- "Pillar bedding" on hang tag Box removal difficult varies •
- •
- Bolt Stops Loose detent force varies •
- Trigger position relative to trigger guard side to side ٠
- Take down screws loosening during shooting ٠
- Scope rail deformation .

The topics in red are classified as potential show stoppers. These effect function and short term customer perception. We will discuss all topics in more detail at 4:00 today.
