MODEL 660 TRIGGER HOUSING
DRILL & REAM TRIGGER PIN HOLE

A proposal to "Drill and Ream Trigger Pin Hole" on the Model 660 Trigger Housing, thereby eliminating an adjustment at Final Assembly (Oper. #6-V), indicates a gross annual savings of \$140 will be realized.

This savings assumes that equipment necessary to perform the operation is available and no capital expenditures are required.

F. G. Carlson, Superintendent
Methods & Standards Section
