FROM S. M. ALVIS

EVALUATION OF COMPETITIVE ARMS

*Re-submit
to Op. Committee
fmc*

Attached are copies of selected pages from a report which the Custom Shop Group has finished on Winchester 770 versus Remington 700 ADL, and Winchester 670 versus Remington 660. I have not included any of the dozen or so photographs.

Would like to know what distribution you and Dr. Calhoun would suggest. It has been shown as "Limited Distribution". Am not sure that is necessary. (Note to G.M. Calhoun: I would think we might as well continue with the plan of formalizing these as AI reports.)

Walker also had Jim Stekl complete a similar one on the M/70 last year but was never published. It is not as concise as this one and was probably used as much as anything else for training of the employee on report writing.

Firearms Design has a report on the M/1400; however, this has not yet been released because of some changes or additions that Leek wished to make.
