Mr. D. S. Tanabe
CONTRA-JET
7920 49th Avenue
Seattle, Washington 98116

Dear Mr. Tanabe:

This is in response to your letter regarding the fit of your muzzle brake on the Remington Model 600 Carbine Rifle.

Our designers advise that this smaller diameter at the muzzle is characteristic for not only the 35 Caliber in the Model 600, but in the Calibers 308 Win., 222 Rem., 6mm Rem., 223 Rem. and 243 Win..

Apparently you should have no problem in other models.

Very truly yours,

S. M. Alvis, Manager
Ilion Research Division
