"CONFINE YOUR LETTER TO ONE SUBJECT ONLY" _____

Ilion, New York
March 20, 1975

TO: E.R. CARR

FROM: J. P. LINDE

SUBJECT: M/580 - 788 FIRE CONTROL DESIGN CHANGE
Suggestion No. PEC-13816

From a design standpoint the greatest advantage of this design change is the standardizing of parts from one model to another. This will allow us to carry fewer parts and thus have less problems in function, and service. This alteration will eliminate carrying the following parts: 1 housing, 3 safety levers, 1 detent plunger, 1 detent plunger spring, and 1 sear. No parts are eliminated in any gun, but the parts are being standardized from gun to gun.
