MINUTES OF MEETINGM/700 LONG STOCK PRESS FORMING

June 23, 1978

The history of RXI-48 was briefly reviewed including the scope and economics of the original project and the December, 1976 Operations Committee report. The current project status was then presented by R. Swartz and samples of M/700 ADL pressed formed stocks were examined.

The future program concerning press forming long stocks was discussed for the remainder of the meeting and the following course of action was determined in preparation for a presentation before the September Operations Committee:

- (1) ESD will complete development work on the M/700 ADL stock.
- (2) Marketing will be asked to confirm the future of the M/700 ADL rifle.
- (3) ESD will review with P. E. & C. and Marketing the acceptability of the M/700 ADL stock press checkered appearance.
- (4) ESD will follow-up with P. E. & C. on their program to develop a satisfactory sealer on press formed cut checkered surfaces.

* Meeting report is attached
