NEW ORDER NUMBERS FOR MODEL 700 CUSTOM RIFLES

In 1977 the M/700 Custom program was modified in an effort to simplify the line, thus enabling us to market the gun on a more efficient and profitable basis. To this end it has been recommended that the present order numbers continue in use and be assigned to guns ordered with RK-W wood finish. New numbers should be assigned to guns ordered with the Satin finish. In other words, please assign numbers to those guns listed under the Satin finish in the below table. The numbers listed under RK-W are those already in effect. This information should be forwarded to those people copied with this letter.
