Mr. N. A. Jones  
686 Baldwin Street  
Meadville, Pa. 16335

Dear Mr. Jones:

Mr. Jim Stekl has showed me a sample of a trigger guard for the Remington M/600 rifle of your manufacture. It is a fine looking guard and it looked similar to one we had investigated but never produced. I dug out our samples and drawings and had a picture made which I am enclosing of our trigger guard cast from a light alloy and yours. I only mention this because, if at some later date we decide to use the metal trigger guard, I did not want you to think we duplicated your styling.

We consider the M/600 to be a fine rifle and realize that the customers do not readily accept our nylon trigger guard. This was why we initiated the design work on the trigger guard. The redesign was proposed to Marketing and they did not want to change to metal because of the way the rifle was being marketed in the Mohawk line.

If at some later date they want to reposition the rifle in the market we would definitely go to the metal trigger guard and floor plate.

Very truly yours,

John P. Linde, Manager  
Manual Firearms Design  
Ilion Research Division
