SEAR SAFETY CAMS FOR HART

We have been selling the above part to Robert W. Hart & Son, Inc. for approx. 15 years for use in 2 oz. triggers. He made them for us until we went to our present design about years ago and we started to make our own. We have continued to sell the sear to Hart for his own use in his 2 oz. triggers.

I feel we should discontinue sale of individual parts of trigger assemblies and sell only the complete unit.

If we continue to sell this part to Hart we could mark it. This could be done as an extra operation and the cost would be passed along to Hart. He buys approx. 500 parts per year according to our Custom Repair people.

I feel as long as the parts are marked and are used only in the 2 oz. trigger we should be able to sell this part to Hart. He should be asked to pay for the extra work for making the parts and to use them only in his 2 oz. triggers.
