TO: G. J. HILL
FROM: J. W. BROOKS
SUBJECT: XP-100 - 7mm BR RECEIVER

The Test Lab has tested the XP-100 receiver broached to prevent hang-up of the 7mm BR case. There were no ejection malfunctions in the ten (10) guns tested. When the broached receiver has been tested with the 221 Caliber we will change the receiver drawing to include the change.

In the meantime the change can be incorporated in the receivers used for the 7mm BR Caliber.
