REMINGTON ARMS COMPANY, INC. Firearms Research Division March 5, 1981 Xc: C.B. Workton J.W. Brooks D.E. Bullis

TO: J. R. SNEDEKER FROM: J. H. HENNINGS

INTRODUCTION

Received from Design three (3) Rem. M700 Classic rifles in 7mm Mauser Caliber for design test evaluation.

OBJECTIVE

To determine if the 7mm Mauser caliber is suitable for introduction into the Model 700 line.

TEST CONCLUSIONS

Accuracy and function tests conducted on the three (3) rifles tested indicate that introduction of the 7mm Mauser caliber into the M700 line is feasible.

No functional problems were encountered during a forty (40) round varied feed speed test conducted on all rifles.

Accuracy tests (100 yd.) indicate an average group size of 1.31" for three (3) five (5) shot groups fired thru each rifle. See data sheet attached for individual groups.

TEST PROCEDURE

A. Preliminary measurements were taken on all rifles prior to test:

Headspace Trigger Pull Safety Check

в.

100 yd. accuracy tests conducted via bench rest using Lyman 10X scope.

Ammo. Used: Rem. 175 gr. 7mm Mauser Caliber

 3×5 shot groups per rifle - cool after each group. Bores cleaned prior to accuracy.

To: J.R. Snedeker From: J.H. Hennings 3-5-81 Subject: Rem. M700 Classic - 7x57 Mauser Caliber - Design Test -2-C. A forty (40) round varied feed function test was conducted in Test Lab shooting jacks.

10 rounds each of the following speeds:

Slow Medium Fast Alternating

FUTURE WORK

Additional testing will have to be conducted on a larger (8 or 10 rifles) selection of rifles before final acceptance can be issued.

JHH:T Research Test Lab Attach.
