File M/700

TO: J. J. BURNS

FROM: W. A. WARREN, JR. ~~WAW~~WAREHOUSE AUDIT - M/700 CAL'S 7x57 AND 7MM-08 - VISUAL

Twenty guns per caliber were withdrawn. These have been visual inspected to normal phase 1 standards, by Finish Gun Auditor R. F. Leskovar. Deficiencies are tabulated without assigning a demerit value.

The guns were warehoused between April 23rd and 28th, 1981. All were examined April 30, 1981.

No defects were found on 22 of the 40 guns. Results are tabulated separately by caliber and for the two groups combined.

COMBINED RESULTS OF 40 GUNS

Listed in descending order

Excess checkering sealer	7
Poor color white spacers	6
Shallow checkering cuts	3
Checkering over-runs	3
Chipped wood	3

Metal	10
Other wood	9
Total	<u>41</u>

The five most prevalent items are wood. They account for over one half of total.
