Jack
8-18-81

I've entered a PCT consignment order for one (1) 700 Varm. BDL rifle, 308 Win., to go to the FBI at Quantico, VA. This order has been marked "Refer to J. Carter for product selection".

The FBI will use the rifle as a test and evaluation sample, and is the leading candidate to replace their Model 70 Winchester Counter-sniper rifles. I want to be sure the sample we send is a good one. At the same time, it must be a good representation of production model rifles, since the 60 they intend to acquire in fiscal 1982 must duplicate its performance.

The latest "Master Production Schedule" doesn't include this model. How soon do you expect it to be available?
