Mr. Joseph Marchbank
 Sprayon Products Co.
 25300 Fargo Ave.
 Bedford Heights, Ohio
 44116

Dear Mr. Marchbank:

The results of the tests which were run on the samples of 711
 penetrating oil which you submitted on the 11th of last month are as
 follows:

	Aerosol	Bulk Sample
Normal	22" Yes	22" Yes
Side	22" Yes	22" Yes
Inverted	none no	none no
Flash Point	+117°F	+ 123°F

I hope that the results of these tests will satisfy your needs. It
 would appear that though the flashpoint of both the bulk and the Aerosol
 are above 120°F the flashback to the valve on the aerosol formulation
 will still require that this be classified as extremely flammable.

Sincerely Yours

Robert J. Neck
