

# EVERY GUN OWNER NEEDS THE MAINTENANCE MAN IN A CAN.

Protective Coating • Lubricate Automatic Mechanisms • Bore Cleaner

If maintaining your gun in top condition is top priority, try new Tri-Flow.<sup>™</sup> It's the Maintenance Man in a Can—the advanced penetrating lubricant with Teflon.<sup>®</sup> Teflon<sup>®</sup> is one of the slipperiest substances in the world, so it makes things slide better, as it reduces friction and rejects dirt.

That's why you can use Tri-Flow all over your gun: as a protective coating against carbon and powder residue build-ups, to protect against rust and corrosion, to clean and lubricate automatic mechanisms, and as a bore cleaner. In fact, you'll run out of Tri-Flow before you run out of uses!

Because, after you're finished with your gun, bring new Tri-Flow<sup>™</sup> lubricant into your house. Use it on anything that slides, glides or pivots.

Why is Tri-Flow so unique? It's more than a penetrating lubricant, it's a complete maintenance system. With rust inhibitors, solvents, water displacers and Teflon<sup>®</sup>.

Right now, many stores have a special rebate to help you get acquainted with new Tri-Flow. For a free booklet, write to Costa Mesa Lubricants, Inc., P.O. Box 129, Olive Branch, MS 38654.

So, if you want to keep your gun in top condition, take aim on Tri-Flow. The Maintenance Man in a Can.
