

Stock/Exterior Components

This stock is made from American Walnut and is of the Monte Carlo design with cut checkering on the pistol grip and forearm. The butt plate is black plastic and has two screws securing it to the stock. There is also an exotic wood grip cap and two Pachmeyer flush mount sling swivels. Inside the stock there is an 8" long structural aluminum channel imbedded in the barrel channel along with epoxy bedding forward of the recoil shoulder. (Photo #11)

The trigger guard is recessed into the bottom of the stock and is attached with two screws; the front screw hole having a heli-coil spring insert. The floor plate hinge is also recessed and is secured by one screw. The floor plate is held up against the stock by a latch
