

SAFE "OFF - ON" FORCES

1 B. Procedure - continued

- Push the Safety Selector Switch, with the push - pull gauge, from the "ready to fire" position, to the "safe" position.
  - Record the force, measured in pounds, in the safe "On" column of the Test Procedure Sheet.
7. Since the Test Procedure Sheet calls for three readings of the Safe "Off" force and three readings of the Safe "On" force, repeat Steps No. 4 through No. 6 for the other readings.
- Model 3200 Safety Selector Switch forces must be taken for each barrel position. Follow Steps No. 4 through No. 7 for one barrel position, then repeat for the other.
8. Put the safety selector switch in the "Safe" position, open the action, and re-check to be sure the firearm is empty.
9. Return the firearm to the desired location, return the gauges to the proper cabinet, put the Test Procedure Sheet in the test folder, and clean the work area.
